compUSA gets its game face on: A pre-game interview

Tucking

his skateboard under his arm, the wiry, energetic 19 year-old enters the interview room in an easy, casual stride. As he settles into the chair opposite mine, he flashes an unexpectedly shy smile, contradicting the ever-present mischievous look in his eye. This is Jones N., the gaming world's latest sensation. With several gaming victories already under his youthful belt, this kid is just getting started.

His air of confidence garners the attention of all around him - especially fellow gamers. In fact, that's exactly how he has come to represent CompUSA's game fixx. During CompUSA's first tournament, Jones N. caught the attention of CompUSA's store manager, who was impressed with the then-18-year-old's commanding knowledge of games and consoles. Once he heard about the innovative gamer's club CompUSA was starting, it was a no-brainer.

When we at IGN got involved, we had a few questions we knew only Jones N. could answer for us. What resulted is the following interview:

I can't remember when I wasn't gaming. I remember going to some kid's birthday party and playing on a console for the first time. That thing rocked! We played non-stop for over seven hours.

IGN: How did you become associated with game fixx and CompUSA?

Jones N.: I was at a local tournament hosted by CompUSA, waiting to play my last match of the day. I ran into the store manager and we started talking. He had this idea for a place where gamers could go to find everything they need - information, reviews, the latest hardware and newest games - the whole thing! We started talking and one thing led to another. When I won the tournament, he approached me about representing game fixx in the CompUSA store. They were looking for the ultimate gamer and there I was. How could I turn them down? This is the most exciting thing I have ever been involved with.

IGN: What are your responsibilities as a game fixx representative?

Jones N.: It's my job to make sure CompUSA is in tune with the gaming community. They are dedicated to making this game fixx thing work, and they need people who know what gamers want. Who better than the future world champion? I get to promote store tournaments, answer gaming questions and help people find what they need both online and in the stores.

IGN: What got you started in gaming?

Jones N.: I can't remember when I wasn't gaming. I remember going to some kid's birthday party and playing on a console for the first time. That thing rocked! We played non-stop for over seven hours. I practically lived at his house until my parents bought me my own. The arcades had cool games too - you know MK-type stuff. The older I got, the better the games got. When the FPS LAN-based games came out, I was hooked. I'd get home from school and play online for hours. I hooked up with a couple of other guys and started going to small LAN parties. Later I got into the local tournaments.

IGN: What was your most exciting gaming experience?

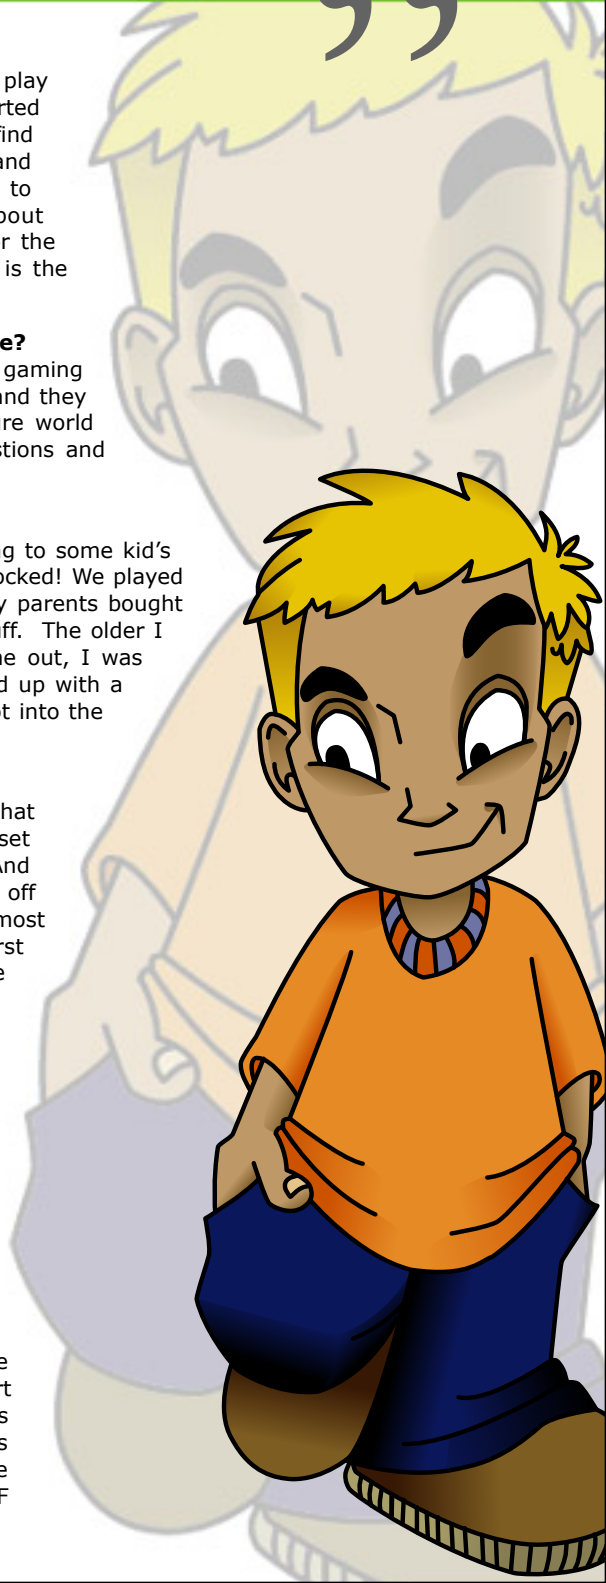

Jones N.: I have to choose one? Well there's a whole group of us that hang. We were in my friend's basement one time and we had a good set of games going - I won 15 matches in a row - it was a total fragfest! And there was another time when we were playing a CTF match and I pulled off a sweep maneuver and took down 14 guys in 10 seconds. The most memorable gaming experience, though, has to be winning my first tournament. It was only a small four-on-four tournament, but the bragging rights alone - not to mention the free games - was great.

IGN: What are some of the other things you do for recreation besides gaming?

Jones N.: What? Do something besides gaming? Just kidding. I do the normal stuff like hangin' with the crew, playing basketball and watching extreme sports. BMX racing rocks. I love skateboarding and want to try snowboarding some time. My buddy Dodja drags me out to play disc golf every once in a while. I've just recently gotten involved with street luge - thanks again Dodja. Nothing but a small piece of metal between me and the asphalt. It's a total rush.

IGN: Do you have other gamer friends?

Jones N.: Yeah, of course. Dodja and I have been gaming since we were kids. He's not into it as much now - he'd rather be out racing dirt bikes or boarding - but we like hangin' together. He keeps the rest of us in touch with the real world. Then there's Nina. She's pretty good. She's actually aced me a couple of times. There are other kids from the neighborhood, too. We all get together for LAN parties and CTF matches.

I do get a special charge out of beating Simon. I love trashin' his game. Sometimes fraggin' him in a match is better than winning the whole tournament.

IGN: Who is the little kid hanging out with you?

Jones N.: That's Walker, my little brother. Huge case of hero-worship with that kid. He thinks he can do anything I can. Walker thinks he's a gamer, but he's just a newbie. Give him a few years, and maybe. Then again, nobody can touch the greatness that is Jones N.

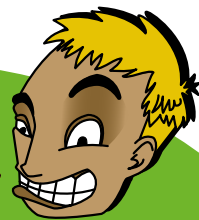

IGN: Is there someone out there you are always trying to beat?

Jones N.: I'm pretty competitive and I like to win just as much as the next guy. I hate people who use cheat codes or try to hack the game. I do get a special charge out of beating Simon. This guy is such a lousy winner – always gets in your face with taunts before the game, then flaunts the win when he gets it. It's even worse when he loses. I love trashin' his game. Sometimes fraggin' him in a match is better than winning the whole tournament.

IGN: Where do you see yourself in five to ten years?

Jones N.: Gaming has taught me a lot about computers and software. I'd like to think I would be traveling the world promoting my own game from my own development company. I think this whole game fixx thing is the beginning of something huge. It's the first step. Who knows? After I become the world champion, I could retire and host tournaments. That would be cool.

From the Editor ::

Chris Carle

Hello, lovely Insiders.

You probably weren't expecting to see my gorgeous mug staring back at you from the pages of Unplugged this month. But my gorgeous mug is what you got. You see, this month's issue is a one-man-show. My show. And I've chosen to bring you a veritable encyclopedia of codes. Forget all those namby-pamby features, fancy lad reviews and weak sauce previews. Forget all the answers to your precious video game related questions. Forget the release dates and news and other nonsense. I've got what you really want. Codes. Unadulterated codes. Pure codes, fresh as the pristine spring water that flows from Codes Mountain.

You're probably saying to yourself, "Hey! I like all that other stuff!" Or, perhaps, "I hate you, Chris, you're a big loser." Well to all that I say, why hate the one who loves you so much? You see, I have toiled to make this one of the most comprehensive codes book around. In this tome, there are cheats and secrets for every viable platform. In the case of the PlayStation 2 and Game Boy Advance, we have virtually every existing code for games on those systems. We've brought you the coolest Dreamcast codes under the swirl. We've also tabbed our favorite codes for the classic systems: the PlayStation, N64 and Game Boy Color. And for you PC-philes out there, we've scraped together codes and cheats for the biggest and hottest games. There is a even a full codes listing for import GameCube games.

The book is separated into sections, so you can find what you need (or what you want to print) quickly and easily. These codes are best when enjoyed in a safe, responsible cheat environment. If you are under eighteen, please operate all codes with an adult present. That's all I have to say. Go forth and cheat! Unlock it all! Use God Mode! And always remember, in the immortal words of Jerry Glanville, "If you aren't cheatin', you aren't tryin'."

Tip: Bonus Dungeon Treasure

Every tenth level of a dungeon contains extra treasure. Make sure you search every corner of the dungeon for the rooms that contain lots of bonus chests. Inside, you will find tons of top-dollar gear, including lots of armor and high level weapons.

Tip: Find Special Items

There are three special types of items that are found almost exclusively in their respective dungeons. These items are useful for trade, fulfilling donation quests or for purchasing certain kinds of weapons. Power Gems can be found in the Lost City. Ooze can be found in the Ancient Forest. Necrystal can be found in the Necropolis.

Tip: How to Use Reagents

There are three Reagents in the game, which will help Anna grow her abilities. These can be found in each of the three Dungeons in the realm. Once found, they can be taken to the reagent receptacles in each of the three towns.

In Westhaven, place a Potent Candle in the Tome of Knowledge to gain +1 Intellect. Potent Candles can be found in the Necropolis.

In Rygard, place a Life Seed in the Life Chalice to gain +1 Life Force. Life Seeds can be found in the Ancient Forest.

In Hom, place a piece of Power Ore in the Golden Statue to gain +1 Strength. Power Ore can be found in the Lost City.

Use Armor Wisely

Avoid wearing metal armor against enemies that have good electrical attacks (Undead). Instead, get a higher-level Leather armor to protect yourself. Don't even dream of going to the lower regions of the Necropolis wearing metallic armor (Plate or Chain).

Dark Cloud

Weapon Level-Up Tip

If you're into upgrading your weapons and creating Synth Spheres, here's a helpful tip that lets you quickly raise low-level weapons to Level 5 so that you can Limit Break them in a sphere. The problem is of course that fighting tougher enemies with a low-level weapon not only requires you to repair it frequently, but it also takes a long time to defeat the enemy. But why fight with the lower level weapon? Simply pick your most powerful weapon, and quickly defeat the enemy. Now, before the slain enemy vanishes, switch to the weapon you want to upgrade. Since there is a small delay before the WHP for the defeated enemy is added, you can easily build up lesser weapons that aren't suited for the enemies you're fighting -- so that you can turn them into spheres and add their powers to your favorite weapon.

Survival Cheat

Have you been having trouble beating the Survival Mode. Fret no more! Try this, Select Survival mode from the Main menu. Once the Level has loaded and the fight has started press the eject on your PS2. The tray will slide out, but the fight will continue. Once you have "KOed" your opponent you can continue to beat him/her mercilessly. The PS2 cannot load the next opponent because you have ejected the disc. Do your ariel attack (UP + PUNCH + KICK). Every time you do this attack you will be rewarded with a bonus item. Continue to do this as long as you like. If you notice the picture below I was able to score over 1 million points with only one win. Once you have had enough of that particulay "opponent" you can simply push the disc tray back in to the PS2 and after about 10 seconds the music will start again the next opponent will appear. You can repeat this trick as many times as you need to. Survival mode should be no problem now.

Tip: Beating the Final Boss

When fighting the queen, the energy sword is paramount. Whenever you are holding it, her shadow attacks cannot touch you. If you take a hit without it, however, you will turn to ash. The way to beat the queen is to hack at her shield with the sword. Once you hit it, the sword will fly from your hand and you'll have to retrieve it. Immediately after hitting the shield, run behind one of two statues at the center of the room. The shadow attack will pass you by.

From this position of safety, scan the room for your discarded sword. The first time it is rejected, it will end up in the right side of the room. The next three times, you will find it on the left side of the room. After four hits, the queen's shield will drop. This time, your sword ends up well behind the statue. Hide behind the right statue. As the shadow passes, you will notice a safe zone on the ground-- a kind of oval. Get as far back in the safe zone as possible. As soon as the shadow wave passes, head straight back from the statue and run to the sword. You'll grab it just as her next wave reaches you. With the sword in hand, stride to the front of the room and strike the final blow.

Second Ending

After you beat the queen, wait until after the credits roll. Another cut scene

will play, then you will take control of Ico on the beach. Move far down the coast to the left and you will find a surprise.

Kengo: Master of Bushido

Play as the Student

While you are at the character select screen you can hold the L1 + R1 buttons and hit the X button to make your selection. Instead of your fighter you will be the fighter's student. This is indicated next to your name as you fight.

MDK 2: Armageddon

Kurt In His Boxer Shorts

At the Main Menu Press and hold L2 + R2 and enter:

SQUARE, SQUARE, TRIANGLE, SQUARE.

As soon as Kurt is done sky diving and is on the ground he'll be without his coil suit and sporting his boxer-briefs.

A Little Piece of Home

While playing through level 5 take a moment to stop and look through the alien telescope. To activate the telescope you must first destroy the BotRock Generator, and the panel on the ledge above the telescope. Now shoot the telescope lens to move it into a position where you can look through it to see crack animator Russ Rice on the Bioware balcony having a puff with some Conehead visitors.

Drop Camera

Here's a little trick that will make a new camera effect for you to play around with. By holding L2 and R2 and pressing CIRCLE, X, CIRCLE, X the camera will be dropped in place. As you move, the perspective will change like in Resident Evil. To return the camera to normal, repeat the code.

Farting Doc

Doctor Hawkins needs a new diet. At any time while playing the Doctor hold down L2 and R2, and press in on both control sticks. Now you can watch Doctor Hawkins do something Nasty.

Invincibility

If those pesky aliens are giving you a hard time, enter the Invincibility Code and they'll never kill you again. First pause the game. Now while holding down L2 and R2, press up, up, down, down, left, left, right, right, square, triangle, square, triangle, select, and finally start.

King of the Coneheads

In the Spider Room of level 7 one of the Sniper Balls will unleash a pack of Coneheads. Rather than shooting them, just stand around and wait. If you look carefully into the middle of the room while standing on the upper ledge you may just be lucky enough to see the King of the Coneheads!

MDK 2 Development Team are Stars

While playing through level 4 don't forget to take a moment to gaze at the stars in the large arena with the three Poopsy Generators. Be sure to kill all of the enemies in this room first so you can star gaze without getting killed. Now, using Kurt Hectics sniper scope, zoom in on certain special stars in the sky (they are usually slightly pinkish in color). There you will find the crack team that made MDK2 possible gazing back down at you, along with their Wu-Tang Clan names.

Matrix Camera Mode

While the game is paused press L1 and R1. This code removes the Pause Menu, giving you an unobstructed view of the spinning Matrix Camera Mode while the game is paused.

Maxs Slo Mo Mode

Want to check out the fine details in the animation? Slow it all down with Maxs Slo Mo Code. While holding down Maxs shoot button press Maxs equip weapons button three times.

The Hidden Castle in the Sky

In level 7 as you are coming out of the tunnel toward the platform with the boss fight you will see two antennas which Kurt can jump up on. This can be difficult, but keep trying. Now turn around and face the tunnel that you came out of and jump to the roof of the tunnel. Now turn to your left and start shooting low at the sky with your Chaingun. You should eventually see your shots hitting something. It is an invisible walkway. Jump down on to

it and keep shooting. Keep following the path of ricochet particles until you reach a little yellow square. It is a fan that will take you up to the next invisible walkway. Use your parachute and fly up. It takes quite a while to reach the top of the airflow, so be patient. Once you are at the top, rotate while firing your gun and look for the same ricochet effect and then fly towards it. Follow this the same as before and eventually you will come to the hidden castle. Take a look around the castle and you might discover something interesting.

Metal Gear Solid 2: Sons of Liberty Demo

Daze the Guards

Even the stealthy sometimes get caught. When this happens, a blue exclamation point will appear above the guard's head. If you shoot the blue punctuation mark, you'll knock the guard out temporarily.

Make Yourself Stronger

Anytime you find yourself hanging from a bar or edge, go into first person mode. By pressing R2 and L2 at the same time, Snake will do a pull-up. Do 100 of them and Octacon will tell you that your Grip Strength has been improved.

Midnight Club: Street Racing

"Smuggle" A New Car

If you have any Smugglers Run save data on your memory card, go into Arcade Mode in Midnight Club. In your selection of cars you will be able to select the Dune Buggy. The message "Thanks for buying both games" should appear with the vehicle.

NBA Live 2001

Creating a Dream Team

In Season Mode of NBA Live 2001, it is difficult to trade for players when you don't have the talent to swap. And because Live only allows player-for-player trades, you may not want to deal your top talent to improve your squad. But there is a fairly simple way around this. To beat the system, go into Season mode, hit CIRCLE to bring up the menu bar and select Roster from the bar. From here, select Create Player.

When creating a player, load him up with maximum stats and save him into the Free Agent pool. Then, return to the menu bar, select Roster and Sign the player you've just made. If his rating is over 90, you will be able to trade him for any player in the league (including Shaq and Allen Iverson). Repeat this process until you have all of the talent you want. Now go win that championship, cheater!

Make a Super Star Even Better

At the Main Menu screen press O to open the Active Menu. Select the Roster option. Then select Edit Player. A Super Star will load up if your Create a Player List is empty. You can make the players stats better (3 pointers, strength, dunking ect...) by hitting R2 at Edit Player screen. If u want a different player go back to the empty Create a Player List by pressing L2. Press Start and change someone else. Don't forget to save.

The Cheat Cards

Next up are the good old Cheat Cards. These can be played during a game and the duration of each particular cheat is determined by whether or not it's a bronze, silver, gold and, in some cases, platinum (the last three cards on the following list only come in diamond). For some of the cards, the duration will be in minutes rather than periods.

Bronze - Odds (1/600), Duration (1 Period), Boost (N/A), Re-Sell Value (170 points)

All of these cards are only available in Diamond.

Onimusha: Warlords

Get the Bishamon Sword

Fight through all 20 levels of the Dark Realm. Kill all of the monsters on the 20th level, then open the treasure box here to discover the Bishamon Ocarina. Then, in the area just beyond the second Marcellus boss fight, use the Ocarina on the bone door here to open it. Then head inside and claim the prize, a sword with unlimited magic which will kill any non-boss character in a single swipe. A powerful ally, indeed.

Beat Oni Spirits...Unlock An Arsenal

If you make it past all 12 levels of the extremely challenging Oni Spirits mini-game, you will unlock a gameplay option that will allow you to start the regular game with a wonderful array of toys. Not only do you get to play through the game with the Bishamon Sword, but you get unlimited Arrows and Bullets, and begin with 99 Soul Absorbers in your inventory. In addition, any magic you use will automatically respawn after the attack. With this at your disposal, beating the game again and unlocking everything else will be a cinch!

PlayStation.2

Unlock Oni Spirits

If you collect all 20 Flourites and finish the game, the mini-game Oni Spirits will be unlocked.

Unlock Onimusha 2 Trailer

Finish the game on any difficulty to unlock a sneak preview of Onimusha: Warlords 2. When you go back to the main menu after saving, go to Special Feature to view the preview footage.

Unlock the Panda Suit

If you collect 10 or more Flourites during the course of the game, and successfully finish, there will be an extra costume available for Samanosuke when you begin a new game... a cuddly panda suit! When you restart, select Samanosuke-Extra to play as the big bear. Note the daisy gauntlet and stuffed friend in the mucus pouch. Don't you love being a marsupial? During gameplay, use L2 to wear the head on or off.

All 20 Flourites

There are 20 special rocks--called Flourites--stashed throughout the game. Finding them all is difficult, but will reap great rewards. If you finish the game with all 20 Flourites, a mini-game called "Oni Spirits" will be unlocked.

The Vision Staff, which can be found near the Bishamon shrine in the West Area, is very helpful in locating Flourites. As soon as you possess it, the rare items will shine, making them much easier to spot. However, you'll have to find the first nine on your own. Below, you'll find a list of every single Flourite in the game.

1. In one of the small alcoves with brown doors near the Seiryu in the Under Temple area.
2. Just after the boss fight in the South area, break a couple of urns and search the floor under them to find the Flourite.
3. In the Keep, after running into Kaede with Yumemaru, you'll find the Flourite in a little cupboard over the

treasure box near the stairs.

4. On the upstairs level of the Keep, through the room just past the red magic door on the catwalk. Step through the next room and find the Flourite under the stairs near the treasure box containing the Arrows.
5. In the upper reaches of the Keep, you will find a Flourite across from Volume two of the Seiryu right after the cut scene where Tokichiru takes off into the night.
6. In the Keep Underground, head down the second hall of glass-encased red samurai. In the left corner (near the last samurai), you'll discover the Flourite.
7. In the Keep Underground, find a Flourite inside the iron maiden in the same room where you get the Blue Key.
- In the West Area, when playing as Kaede, find the secret room (use the Gear to enter). In front of the Buddha statue here is a Flourite.
9. While playing as Kaede in the West Area, you will step into a burning room just past the gate that required the Gold and Silver Plates. Through the door left of this entrance is a narrow staircase. Next to the staircase in a heap of barrels, you'll find the Flourite.
10. In the West area, you'll find a Flourite just outside the door after obtaining the Vision Staff with Samanosuke.
11. In the West area, find a Flourite on the hill with the sled just outside the castle.
12. In the West Area, you'll find a Flourite blinking in the path on your way to the room with the statue (where you got the Matchlock).
13. In the East Area (with Samanosuke), atop the roof there is a bell. In the walkway around the bell is a Flourite.
14. While playing as Samanosuke, collect the Flourite on the pier just past the Magic Mirror room in the East Area.
15. In the East Area, just when you begin playing as Kaede, you will enter a shrine just past the locked door you pick. A Flourite is on the floor just to

the right of the door.

16. While playing as Kaede in the East Area, climb a ladder in the bridge house Magic Mirror room. Destroy the crates here to find another Flourite.
17. In the East Area, while playing as Kaede, you can find another Flourite atop a chest in the room where you get the final book of the Suzaku.
18. Sixth level of the Dark Realm
19. Eleventh level of the Dark Realm
20. Seventeenth level of the Dark Realm

What's Your Grade?

Onimusha: Warlords allows you the opportunity to rate your progress, based on a series of points. The perfect score is 30, meaning you have to score all available points in three categories:

Time taken to complete
Up to 3 Hours= 10 points
3-4 Hours= 7 points
4-5 Hours= 5 points
5 or more Hours=3 points

Number of demons killed
0-399= 3 points
400-499= 5 points
500-599= 7 points
600 or more= 10 points

Number of souls collected by the gauntlet
0-34,999= 3 points
35,000-44,999= 5 points
45,000-54,999= 7 points
55,000 or more= 10 points

The points add up as follows:
0-9= D
10-17= C
18-24= B
25-29= A
30= S

If you score a perfect 30 and earn an S rating, Kaede will get a special costume of her own... and it's quite demonic. Access it from the same menu as Samanosuke's Panda outfit.

Tip: Beating Pyramid Head in Blue Creek

After the short cut scene concludes, pull up your gun and start popping caps. Every time a bullet successfully connects, you will hear a dull clang. Pyramid Head will move toward you slowly, dragging a huge blade arm behind him. As he slowly moves toward you, keep popping. However, make sure you move to the stairway at the bottom of the room as he approaches. When he reaches the area in front of the door, run up and past him.

At this point, he may raise his blade, but move to the opposite end of the room and keep firing. If you get hung up on him and he drops the blade on you, you could be killed (or worse). After you plug him about 30 times, an alarm will sound in the distance. Pyramid Head will make his way down

the stairs and into the watery area below, draining the stairwell. Don't follow him too closely as he leaves, or he'll kill you with his cleaver. However, once the water has completely drained, move down the staircase and exit through the slimy blue door.

Unlock Leann Caldwell

When you play through the game you will notice Kou talking on the phone to someone. If you play through as Kou, you will hear her voice and learn that her name is actually Leann. You can actually play as this mysterious character by playing through the entire game as Kou (which means, you cannot switch to any other character at any time).

During the end sequence, Kou will encounter Leann in the Central Square area and do battle with her. To defeat her, block her attacks and use the Circular Uppercut (ES+MEDIUM buttons) move to juggle her into the air.

Unlock MSF Kou

If you play through the game as Kou, you will encounter a part where he is infiltrating the Mikado building as a MSF soldier. Once you reach that part and save your game, you will be able to use that costume in Survival and Versus modes.

To select the costume, hold L1+ L2 + R1 + R2 when selecting Kou in Versus or Survival Mode.

To select the costume, hold L1+ L2 + R1 + R2 when selecting Sion in Versus or Survival Mode.

Unlock Wong Leung

To unlock Sion's sensei, Wong you must play through the game as any character. When you come up to the battle against Kaldea (the battle right before the final fight), have any character other than Sion fight her. Then, use Sion to complete the game.

During the end sequence, right before Dominique comes to visit Sion while he is working the door of the bar, you will view a flashback sequence where Sion will do battle with his master, Wong.

Wong fights similar to both Sion and Dauragon. He uses the same two-fisted attack as Dauragon (where he can hit an opponent both in front of him, and behind him), as well as leg sweeps similar to Sion. You can use normal attacks against him, but one special move in particular works very well.

Block attacks from Wong, and while he is recovering from one press the ES+MEDIUM buttons (whatever you have them assigned to) to perform the Torpedo Kick move, which will take off a bit of damage and knock Wong off his feet. Turn that into a pattern: Block, Torpedo Kick, Block, Torpedo Kick, etc.

Convert Weapons into Health

Here's a handy code that you can use to refill your health whenever you have some weapons picked up.

During the game, hold down all four shoulder buttons, then press TRIANGLE, X, SQUARE, and finally CIRCLE.

Your weapons will vanish and you're health will fill up a little.

Decipher Minion

To understand what Minion's numbered codes mean on the load screens (when playing as him), just match up the number with its corresponding letter. A=1, B=2 and Z=26. The various messages you get are as follows:

I must speak in code or he will discover me.

All of us are trapped in his head.

We are trapped in his head.

I do not think this is real.

This is how he sees the world, how Sweet Tooth sees his life, it is not real.

In the real world my name is Marcus A. Kane.

I miss the old colorful world.

Different Weapons Display

Press and hold SELECT, then press RIGHT during gameplay to change the weapons selection display.

Downtown Jackpot

In the downtown level, on one side of the river is the R&D Chemicals Plant. On the left side of the main building are 3 giant balls, like the ones in the highway loop level. Shoot the one closest to the sign with a gas can and it will roll into a building, knocking it down and revealing 3 healths (which are supplied throughout the level at this location). Shoot the ball on the far left and it will roll into the building directly behind the previous one, giving you 6 power missiles.

Elevator in Downtown

Elevator in Downtown Want to get a bird's eye view on the world? Find this elevator to pick up power-ups and escape the city hustle and bustle. Find the Atom Bank, and face it. To its left is a building with a glass set of doors. Shoot them and they'll blow to pieces, and then use the elevator to drive up to the higher reaches of the building. There's not much up there, except for

one health power-up, but it's a great view!

Infinite Ammo

To have unlimited ammunition for your ride, press and hold the shoulder buttons (R1, R2, L1, L2) then press UP, X, LEFT, CIRCLE.

Invincibility

As with all invincibility codes, this has serious potential to ruin gameplay. Please do not use this code and then say that Twisted Metal: Black was too easy, or too short or lame, because if you do that, you are a whiny-ass titty baby. Sermon over. Here's the code:

During gameplay (yes, this includes story mode), press and hold all four shoulder buttons, then press RIGHT, LEFT, DOWN, UP.

Mega Machine Guns

To enable the Mega Machine Guns feature, press and hold all four shoulder buttons (R1, R2, L1, L2) and press X, X, then TRIANGLE.

One Hit Kills

During gameplay, press and hold L1 + R1 + L2 + R2 and quickly press X twice, and Up during game play. At the top of the screen a message will confirm you've done it right.

Open Elevators Level

Go the Highway Loop Level and kill off about six to seven of the combatants. Drive to the raised, broken bridge (with the two health pick-ups and another pick-up in between), and find what looks like a power plant, directly off the road. There are about two to three giant steel balls there. Shoot the one closest to the bridge with a Gas Can (the projectiles don't work well for this), and it will break off and start rolling. Make sure to stay clear of its path, or you'll be squashed. Follow the ball and when it crashed through a wall, follow into the newly opened area and find the Black Cube inside. Health and weapon pick-ups are also inside.

Open Freeway Level

To open the Freeway for multiplayer action, get 10 Kills in Survival Mode in the Snowy Roads arena.

Open Mini-Suburbs Level

To open the Mini-Suburbs for multiplayer action, get 10 Kills in Survival Mode in the Drive-In arena.

Unlock Axel

After beating the first level, choose the Freeway level, not Suburbs. (And it's not the Highway Loop level we're talking about.) Drive to the middle of the level, where an entrance to the construction lot and a Repair Station are located. Of the two cranes located here, focus on the left one. Center your vehicle in the middle of the construction site and use the middle ridge to aim any kind of missile toward the orange control box near the center of the crane. Locate your vehicle about half way up the ledge for the perfect shot. Doing this takes time, and enemies are sure to throw a barrage of projectile at you, so it's wise to beat down several of them before trying this.

Unlock God Mode

During gameplay, press and hold L1 + R1 + L2 + R2 and rapidly press Up, X, Left, Circle while playing. You will see a message at the top of the screen that reads "God Mode On," confirming you did it right.

Unlock Manslaughter

Manslaughter, the giant dump-truck driven by Black, is located in the Prison Passage level. Down on the docks to the starboard side of the landed ship is a stack of crates with a health power-up on them. Shoot the crates to blast open a ramp to the health, and then shoot at the ship's hull just above where the crates are stacked against it. A panel will open, and you can drive into a room inside the ship where Manslaughter is located. As per usual, destroy the control panel to unlock the new car.

Unlock Minion

To unlock the bad-ass truck Minion, beat the Story Mode with every character, including those you unlock in the game. In other words, beat the game with all starting characters plus: Manslaughter, Warthog, Yellow Jacket, and Axel.

Unlock Warhawk's Level

To open up Warhawk's multiplayer level in the first level (Zorko Bros. Scrap and Salvage (a.k.a. the Junkyard), focus your efforts on the vertical crusher. There are at least two ways to get up on top of the vertical crusher -- this first way is easiest. Drive up the ramp to the broken freeway and drive about half way along it. Aim your car toward the Bob's Big Boy (that kind of looks like Nintendo's Luigi), and shoot it, preferably using a Power or a Fire, to avoid hitting any other cars. When that blows up, it'll create a ramp to the vertical crusher. Drive down to the newly created green ramp and, when the crusher is down, drive up onto the crusher. Be careful to drive slowly onto it and not to driver right over it. When it ascends, shoot the building on the top of the deck, and then drive onto the deck. On the left side is a Black Cube, which opens up Warhawk's multiplayer level.

Unlock Warthog

In the Suburbia level, head up to the carnival area. At the gate, take a left and head toward the smoke that appears just over the ridge. Aim your vehicle for that, speeding up and ramping off the angled dirt ridge here. You'll land on a building below with a large hole in its roof. Go inside and look for a control panel in the corner. Shoot it to unlock Warthog.

Unlock Yellow Jacket

In the first level, Zorko Brothers Scrap Salvage, you can see an airplane circling around again and again. Use a homing missile and shoot it down with any kind of tracking missile, preferably homing missile. It's best to lead the

missile to the plane, rather than to shoot after it, otherwise the missile will blow up before it hits the plane. Go to the wall near the giant magnetic slammer and shoot from there. Once that's done, drive down to the lower section of the level. The plane has crashed and you can drive in it. Go to the end, find the console and shoot it with machine gun fire. After about four seconds, you will see Yellow Jacket's car lower down.

Luigi's Mansion

Another Mansion (Ura-Yashiki) Mode

Rescue Mario and finish the game once. You will get ranked according to how you did and receive a letter grade. Save your game. You now have the option to restart Luigi's two ways (in addition to going to the completed Gallery). The first option lets you go back to the regular Luigi's Mansion Mode. The second option, called Ura-Yashiki (Another Mansion) in Japanese, lets you restart the game -- and presumably some of the things in the mansion have been changed around.

Hidden Hearts

If you're running low on lifeforce, get out your vacuum and start cleaning lamps and vases. Almost every second vase has a heart hidden inside -- and nearly every lamp or chandelier either yields money or health. Happy hunting. submitted by IGN Cubists

Reward for 50 Boos

One of the sidequests in Luigi's Mansion is the capture of the 50 Boos that you released accidentally in the beginning of the game. Finding Boos can be a time-consuming task as you have to make your way through the whole mansion and track them with your Game Boy Horror "Boo Sensor." Boos like to hide in rooms with the lights on, so be sure to check in every nook and cranny. A blue light on your GBH means there's no Boo to be found, a yellow light means you're close, and red means you're right in front of the hiding ghost. If the light is red, switch on your vacuum or examine the object in question with A. Watch out, though, not every red light equals a boo. Sometimes a Boo Ball will fall out (you can simply blast it at a wall or leave it where it is), or a bomb that has the potential to cause some damage -- so run! If you're having problems finding all 50 Boos, be sure to look in the "door-less" treasure rooms.

The reward for catching all 50 Boos is a large diamond.

Secret Treasure Rooms

There are two secret treasure rooms in Luigi's Mansion that you can access to load up on gems and money.

The first one is located on the first floor, in the south-west corner of the Mansion. After you have sucked in the candle-carrying butler, examine the room with your Game Boy Horror to find a mousehole. Press A to activate it and go inside to enter the treasure room.

The second treasure room is accessible from the roof top. Use the elevator in the toy chamber to get on the roof, then go all the way to the right and climb up on the chimney. Fall down and you will land in another treasure room.

Secret Warp Zones

Running around from one end of the mansion to the other can be a very time consuming task. Thankfully, Nintendo has implemented hidden warps that let you zoom back to the entrance hall.

Basically, any mirror in the mansion (except for the large one that reflects the invisible ghosts) can act as a warp. To warp using a mirror, switch to your Game Boy Horror's first person mode and examine the mirror with A. After a really trippy warp sequence, you will find yourself in the entrance hall of Luigi's Mansion.

Water the Plant

Ever notice the seed in the outdoors area with the dog house? It's at the right side, near the graveyard and just underneath the balcony with Toad. This seed hides a secret that you can unlock right before facing the second boss. Once you have the ability to use the Water Element, water the seed. A plant will grow. Now enter the dog

house (examine it with the Game Boy Horror) and defeat the second boss. Return to this area afterwards and water the plant again. Now continue with the game, but be sure to return after you defeat boss #3. Water the plant again and it will bloom and produce a precious diamond.

Note that if you fail to return and water the plant after a boss fight, the plant will wither and die.

The trick here is to remove your memory card from the machine at this point. Now you can select whichever mini game you'd like to play and it the game will not deduct the points from your earnings, as it won't be able to save. following buttons at the same time: X + Z + START. A new option named "Password" will now appear. Here, you can enter passwords to compete in official time attack challenges.

How to Unlock Time Trial Weather Conditions

To unlock the different weather conditions in the Time Trial mode, you need to play the Championship Mode... a lot. Every time you enter a new Championship, the weather conditions for the tournament days are randomized. If you complete a race on a track, the weather condition that you encountered will be unlocked Time (only for that difficulty level and track). So if you want to unlock Southern Island with rainy weather, check your forecast. If rain is predicted for the third day, choose Southern Island as your third track to race. That's it. Good luck.

Final Fantasy Anthology

Easily Defeat Wrexssoul in FF6

For those who think it is difficult to defeat the flame boss: Wrexssoul in Cyan's dream, consider doing this. All you need to do, is Immediately use the X-zone spell (can be learned with the fenrir esper). This should kill Wrexssoul in one hit.

Easy Ability Points in FF5

For easy ability points (say, 4-8 per battle!) go to the basement of Bal Castle in World 2. Here you'll encounter Statues in groups of 2 (4 ability points) or 5 (8 ability points). However, you will most likely find yourself having difficulty with these stone warriors. Using a Soft potion will kill them instantly! Just keep stocking up on Soft potions and master all those classes that require hundreds of ability points!

Easy Kills in FF6

To instantly destroy almost any monster (including most bosses), simply cast Vanish on them, then use X-Zone. It will instantly destroy all invisible enemies. Use Doom if there is only 1 enemy.

Easy Spell Learning in FF6

WORLD OF BALANCE

Fly to the Triangular Island after learning the Doom spell. You'll eventually come across an invisible sleeping enemy. Use Doom on him. He might cast Meteo. Each victory you eek out

nets you 10 magic points towards spell learning.

WORLD OF RUIN

Equip everyone with the Esper they are lacking in and fly them to the Miranda Desert. Each Hoover here gives you 5 Magic Points, while each Cactuar nets you 10.

Easy Experience Points in FF5

In final fantasy 5, once you get the summon Bahamut, there is an incredibly good and easy way to get tons of experience points. You'll notice that if you follow the mountain range south from North Mountain, (the place where you got Bahamut,) there is a small patch of trees where you landed your black chocobo to get to the desert. Now that you're there, simply walk up and down in the area of the desert that's RIGHT next to the forest. There, you will encounter enemies, which you can EASILY kill with one hit by using Bahamut. The enemies in that area can give you from 1200-1500 experience points! Just simply keep using Bahamut first-thing in every battle, and once your summoner runs out of magic points, simply take your black chocobo, and fly a little ways south to a town where you can use an Inn, and fully restore your HP and MP, and then simply go back to the desert and repeat the process. *NOTE: This will only work in THE THIRD WORLD.. but once you get to the third world, this is easily the best way to gain levels in the entire game!

Easy experience points in FF6

WORLD OF BALANCE

Before the Lete River quest, set your config on "memory". Next, go through Lete River to the part where if you go up, you circle and come back to the same spot. Choose up and enter a battle. Have Edgar, Terra, and Sabin attack while Banon uses "Health". If you set a turbo controller for this, you can leave it on all night.

WORLD OF RUIN

Equip Phantom and the Exp. Egg on one person, and have them fly to Doma Island. Immediately into a battle, cast Phantom. Fight here. Each battle grants you 6000-11,000 EXP per victory. The Tumbleweeds have a spell that removes invisibility, so be careful. After you get a person to level 80+ here, you should fly to the Dino Forest near the Veldt. The enemies here give you lots more, but they have spells that remove your invisibility.

Economizer Relic in FF6

This relic is very useful as it reduces your magic cost to 1 point per spell! Here are three ways to get it:

1. Go to the Phoenix Cave with Locke in one of your parties. Steal from the Apuila (A bird creature) and you will get an Economizer. Try several times because sometimes you'll just get Fenix Downs.
2. Go to the forest east of Gau's father's house. Sometimes a Brachiosaur appears. Fight it (VERY HARD) and sometimes it drops an Economizer.
3. Go to the Coliseum and bet a Gem Box. If you win the battle you'll receive an Economizer.

Finding Your Party in the World of Ruin (FF6)

Locke- Found in the Phoenix Cave (must have airship first!)

Sabin- can't miss him. In the first town when Celes reaches the shore, Sabin is holding up a damaged house.

Edgar- The so called "Gerard" is Edgar. Follow him to Figaro castle and go to the control room filled with those tentacles.

Setzer- Keep talking to him in Kohlingen.

Cyan- Go to Zozo, but the rust-rid and use it on the rusted door, climb Mt.

Zozo and look for Cyan at the top.

Gau- Take three members to the Veldt and fight until Gau joins up with you.

Relm- go to Jidoor, make your way

through Owzer's home and fight Chardarnook. After the fight she joins you. Strago- After you have Relm, put her in your party and visit the tower of fanatics. Strago will join you if you have Relm.

Terra- on your second trip to Mobliz, fight Phunbaba, after the fight is over, Terra joins up with you.

Shadow- see "getting shadow in the world of ruin"

Mog- This one is easy. Find Mog in the Moogles Cavern.

Umaro & GoGo- see "secret characters"

Gain Levels Overnight in FF6

You need a turbo controller for this trick. On the Lete River, when you go in circles select fight, fight, health, and auto crossbow using memory (config menu) if you do this correctly you can leave it sitting overnight and be at level 50 - 65 the next day.

Get Edgar's Chainsaw in FF6

To get Edgar's chainsaw, In Zozo, there should be a clock in one of the buildings. The answer to the clock puzzle is 6 hours, 10 minutes, and 50 seconds.

Get Gogo and Umaro in FF6

GOGO - in the world of ruins go to the triangle island and fight a zone eater let it suck your party up and you can find Gogo.

UMARO - Go to Narshe in the world of ruins then go up to where the esper Tritoch is. Fight the esper and he will give you his powers then a chunk of the mountain will fall down. If you enter the hole you will find a maze that leads to the Terrato esper, some magicite, and Umaro. If you have Mog in your team he will join you.

Get Mog in FF6

To get Mog before the world of ruin go to narshe after you get your girl from ZoZo. (It should automatically send you there.) Walk out of the elders

house after she says she'll talk to the Espers. Then go to the house with all the treasures in it. (It's on the east side of the town on the upper level.)

You will see Lone wolf stealing the treasure out of the locked chest. follow him out, he will lead you up to the Esper, he will threaten to throw Mog the edge the. Then the Esper will knock them both off, they will both be hanging on. If you save Lone Wolf he will give you the gold hair pin that he got out of the chest, if you save Mog he will join your party.

Get the Exp. Egg in FF6

In Darill's Tomb(World of Ruin) you can find the exp. egg relic. It doubles the number of exp. points a character gets after a battle. First, find the seemingly worthless room with four tombstones. On them will be carved four-letter phrases that make no sense. Then find the room with the blank tomb-stone in the upper left area of the tomb. Go to the tombstone, it will ask you to carve an inscription. The four non-sense phrases will appear. Carefully select each one in an order to where the phrases lined up will say "The world is square". Then you will be told where to find the egg. In the third basement, a wall will have opened up to the right of the treasure chest. Walk through the wall and get the egg. submitted by Jasen

Get the Genji Glove in FF6

You can get a Genji Glove when you are at the returners base for the first time when you go outside and talk to Bannan. When he asks you to become the last ray of hope (or something or other) say no, he will send you inside. Go back out and say no again, he will again send you back in - go out one more time and say no again he will send you inside and the injured soldier will come in and you will get a Genji Glove instead of the Gauntlet. submitted by Peter Morrison

Get the Mooglr Charm in FF6

Here's how to get the Moogles charm, possibly the best relic in the game.

When you first find mog, talk to him. he will join your group. after this happens, walk to the wall that was behind him, and press search. (a) You will receive the charm. With this Item equipped, you cannot be attacked by invisible monsters.

Get the Paladin Shield in FF6

To earn the Paladin Shield, you must get the Cursed shield from an old man in Narsh after you get the Falcon Airship. Equip the shield, and win 255 battles with it. That will break the curse...and thus, you will now have the Paladin Shield.

Once the shield becomes the Paladin shield you can complement it nicely by also equipping the ribbon. The character who has both of these items will be impervious to every ailment except the count down timer.

Get the Rename Card in FF6

During the course of the game, you may find you don't like the names you have selected for your characters. Like if you named Sabin after your former best friend and you want to change it. Go to the Colosseum and bet the Elixir. If you defeat Cactrot you win the Rename Card. And if you don't like it, you can bet it for the mysterious Marvel Shoes, if you can beat the Doom Dragon. Suggestion: Equip a strong character like Cyan with the Genji Glove and Offering to really clean up at the Colosseum!

Get the Second Memento Ring in FF6

Make your way to the second floor of Strago and Relm's house. In the left hand corner (the one with the tables and chairs) face south and press A to gain another Memento ring. submitted by cloud_strife3

How To Get All of the Strago's Lores in FF6

To get all of the lores go to Kefka's tower and fight DARK FORCE. Use life three on all of your party members. Also take Strago with you because he has to learn the lores. The Dark Force will use all of the lore attacks that strago needs to know. (You will have to wait awhile to get the dark force to use Quassar)

How To Get the Spell Ultima or the Ragonrok in FF6

First you have to get Locke back in the Phoenix Cave(2nd world). After that you must go to Narshe with Locke in your Party. You go up to the weapon shop and Locke should unlock it. Find a way into the backroom and talk to the man. He will either Give you the Esper stone with Ultima or he will give you the Ragonrok Sword. I prefer the Ragonrok because it does a critical hit every time and takes away 9999. Or close to it. But you could Get the stone and that does a good 4000+ to every Enemy.

Kill the Boss of Magic Tower Easily in FF6

In the World of Ruin there is a tower where only magic can be used. At the top, after you get the Gem Box, you will fight a boss. This boss is pretty hard because he always changes his element. Here is the trick. Cast "Stop" on him. Then cast "Scan" to find out his weakness and hit him with that element. Don't forget to use "Life3" on all your party members because at the end of the battle he casts "Ultima" which kills everyone.

Mimic Class in FF5

In world 3 after you get the submarine, go over to the water near the pheonix tower, so that the tower is on the upper left. submerge and there should be a tower there. this tower is the sunken water tower from the first world. go through it and when you get to the end, and can go no further search and say yes. then you'll fight gogo. when

you fight him, do nothing but defend. if you attack him, he will kill your party very easily. after beating him you will get the mimc class which can equip any armor except ribbons and the weapons of a black wizard and white wizard. also, the class can attach up to three additional abilities. the downside is if you want the fight or item commands you have to use an ability slot to attach them.

Relic Combos in FF6

1. Economiser and Gembox: Lets you cast two spells for 1 mp a piece. (Ultima twice kills most of the final statue parts)
2. Offering and Genji glove: attack eight times in one turn.
3. Offering and Thief glove on locke: He attacks and steals (mugs) 4 times.

Ancient Forest

To get to the Ancient Forest before disc 3, simply ride up the hill with a black, gold or green chocobo.

Beta Materia

When you first go to the Chocobo ranch you have to catch a chocobo to avoid the Midgarsorm. Well, I fig-

ured out a way to get the powerful Beta spell before the second disc. You need the Enemy skill materia, a Fire materia, and any elemental materia equipped on one person. MAKE SURE THE LAST TWO ARE ON YOUR ARMOR!

If you keep this character healed until Midgarsorm casts Beta you SHOULD be able to survive the spell. Then just finish him off. This is tricky to pull off but if done correctly you will be set for a LONG time.

Cast Any Spell Three Times

To cast three magic spells in one round, first equip someone with a Magic Materia + "All" Support Materia. You'll also need Barrier Materia with the Reflect spell learned. When you enter battle, cast Reflect on the entire party, (your party). Then cast the magic spell that was connected to the "All" Materia on YOUR party. Even though you casted the spell once, it will be reflected and returned to the enemy hitting for three times! And for the same price of the usual MP's. What's even better is that if you have W-Magic, you can cast that spell twice, or two different spells (both need to be connected to "All" Materia) hitting for six times!!!

Chocobo Tricks

While racing the chocobos, hold L1 + L2 + R1 + R2 to increase your speed. To increase their stamina, hold R1 + R2.

While choosing a chocobo to race, press L1, L2, R1, R2 or any direction to pan, zoom and rotate the chocobo you're viewing.

Curse Ring

While in Mideel (before it has been destroyed), go to the weapons shop and check the door in the back (the one that does not open.) Next, go to the shop on the hill with the man on the balcony. Walk behind him along the part of the balcony on the side of the

PlayStation.

shop until you here a rattling sound. Check the spot and you will get a key. Use the key on the door, and it will break off. The owner will ask what happened. Tell the truth and he will give you the curse ring. If you lie, he will not give it to you. It raises all of your stats, but puts the character on death sentence, but this can be countered with a Phoenix Down.

Debug Mode

NOTE: This code requires a Game-Shark.

This code is by far the coolest thing you will ever see. First enter the code "8009A05C 0041" into your Game-Shark. Start-up FF7 with the first disk. Choose "New Game". Instead of the normal opening CG movie you will appear in a room filled with Japanese symbols. IMPORTANT! Turn off your Gameshark after you are in the room.

Walking onto these symbols will transport you to other rooms where you can go to any point in the game, watch the CG movies, and gain a complete set of Materia among other things. You can also talk to the man in the bottom left corner to adjust other settings.

For complete instructions on how to use this debug room consult Game-Faq's Final Fantasy 7 section.

Defeating Savior Sephiroth

For this fight you will need: Knights of the Round, Zero Bahumut, and any other summons. Cure 3, Wall, "Mime", DeBarrier, Remedies and at least three Megaexlir's.

Start out by casting Wall on your party, then cast DeBarrier to take away Sephiroth's wall. After this has been done throw everything you've got at him, use Mime to cause major damage. During the fight Sephiroth will levitate higher, signaling he's preparing to cast Super Nova. If you are above 1500 energy you should be alright, watch out for his Heartless Angel

that will not kill you, but bring your health down to 1. Then use Megaexlirs. Keep up the endurance and Sephiroth shouldn't be to hard to beat.

Easy AP

Go to the forest outside of Meedeel. Walk around until you fight Head Hunters or Caterpillers. Equip Cloud with an Apocalypse sword and everyone with a Rune Armlet. If you fight a group of 4 Head Hunters you get 340 AP. Caterpillers and a group of 3 Head Hunters give you 240 AP. Equip as many 'ALL' and 'MAGIC PLUS' materia a possible in the sword and Rune Armlet. When mastered they are worth 1.4 million gil each.

Easy Accessories

Here's a way to get two very helpful accessories.

Ribbon: To get a ribbon you must go into the crater and walk around until you fight a Master Tonberry (a mole creature with a rotating yellow star above its head.) Attack him a few times and then morph him. He will turn into a Ribbon.

Tetra-Elemental: There is a small desert island in the south under the Western Continent. Land there with the Highwind or with a gold chocobo. Walk on the sand until you fight a small cactus man. Morph him a eh becomes a Tetra-Elemental. Note: I have had the best luck morphing with Yuffie simply because see deals 9999 HP damage each time. It may be a different case for you but Yuffie is usually the best morpher.

Easy Life

With this code, you can easily restore life while in battle without having to worry about anything happening. Enter a battle, and when your characters' health gets low, cast regenerate on him/her/them. Once the spell has been cast, open the Playstation lid and have someone cast a spell.

FOR THIS TRICK TO WORK THE LID ON THE PLAYSTATION MUST BE OPEN BEFORE YOU CAST THE SECOND SPELL!

With the lid open, the game won't be able to cast the spell, so the game will stop until you close the Playstation lid. Once the lid is closed, the game will function corectly and you can resume play. The trick to this code is that while the game is looking for the CD, the regenerate spell will still be working, so your life will fill up while nothing else happens! This code works great for some of the ultra tough bosses (Emerald and Diamond Weapon) because nothing else will happen while the lid is up.

Easy Money

If you want virtually unlimited money, here is a wonderful trick. As soon as you have mastered an "All" mateira, remove it and replace it with the new born one and sell the old one. This may seem like kind of a harsh compromise, but each mastered "All" is 1.4 million gils! and scince they are so easy to master you will keep geting more and will never miss them. Sell one or two and you will never run out of money ever again!

Easy Money, AP and Experience

Go to the desert outside of the golden saucer and walk around for a while. Sooner or later a little cactus man will appear. You can't beat him with magic or weapons, but he can be defeated by summoning Chocobos or Mogs. If you manage to kill him he's worth 10,000 gil!

For better results, head for the Mideel Area (an island in the south) and look for Sea Worms. Each one you defeat is worth 1300 EXP, 200 AP and 5000 gil!

Effortless GP Gain

To do this trick, you need a joystick controller with rapid-fire settings and

PlayStation.

access to the Gold Saucer. Go to Wonder Square, and up to the arm-wrestling game. Wrap a rubber-band around your joystick so that it's pulled to the upper left diagonal, so that Cloud continuously walks into the arm-wrestling machine but not into the GP-trading girl. Now, turn on the rapid-fire for the 'O' button. Cloud will now repeatedly challenge and beat the wrestling game. Slowly but surely, your GP will increase. It takes a while, so it's probably best to set this up just before you go to bed at night, and leave it on while you sleep. By morning, you should have plenty of GP to buy your Gold Pass and the two secret Materia: XP-Plus and Gil-Plus. Cheater!

Fast Materia Level-Ups

This cheat can only be done in the third disc. First, go to the Northern cave and look for mole like creatures with a star above their heads, also holding a knife and a lantern. Steal an elixir from them and then run away. After that, look for these small creatures in a floating pot. They will say "Gimme' an elixer". Give them one. Then kill it. Each one killed will give you 1,000 AP. You can not kill them unless you give them an elixer. submitted by TAKER 3:16

Gain Limit Breaks Easily

When in normal status use a "Hyper." This will let your limit meter go up faster, so you can use your old techniques more. The reason for this is that one way to get your limit breaks gained is to use your old techniques.

WARNING: When you use the "Hyper," your status changes to "Fury," which will lessen your hit rate.

Another way to gain your limit breaks is to defeat large groups of enemies. Try this: When leaving the Nibel Mountains and heading for Rocket Town, you should see a group of forests when you leave the mountains. Try engaging combat there, because sometimes you fight large groups of

enemies there. Such as a group of six "Battery Caps," or sometimes five "Battery Caps" and one "Valron." This might help in getting your limit techniques also.

Huge Materia

To obtain the Huge Materia in Rocket Town, press Circle, Square, X, X as the passcode.

There are four huge Materia that can reproduce other materias if you can pass the requirements.

Blue - You must have Bahamut and Bahamut Neo. Take these to Cosmo Canyon and talk to the Blue Huge Materia and you will receive Bahamut Eishiki (Zero).

Yellow - Master the Steal, Throw, Mime, Manipulate, Morph, Deathblow and Sense Materias, then talk to the yellow huge Materia to receive the Master Command materia.

Red - Must have all 16 summoning materia at master level then talk to the red huge materia to receive the Master Summoning materia.

Green - Have all 21 magic materia at master level then talk to the green huge huge materia and you will receive the Master Magic materia.

Item Duplication

If you have the W-Item Materia, equip it and enter battle. Use the W-Item command and select your first item you want to use with the Circle button. Then choose your second item but do not use it. Select it so that cursors appear on the screen (either on you allies or your enemies) then cancel with the X button. Select again and make the cursor appear then cancel. Repeat the selecting and canceling of the second item over and over. Each time you do this the quantity of the first item will increase by 1.

Knights of the Round Table

Ride the Golden Chocobo to the North-Eastern part of the map. There you'll find a hidden island with a cave. Enter the cave and talk to the red light to receive the "Nights of the Round Table" spell.

Limit Break Manuals

To learn Level 4 limit breaks you'll need to find the manuals. Here's how to find them.

Cloud: Trade 32,000 battle points at the Golden Saucer.

Tifa: Go to Nibel area (Tifa's house) and play these piano notes: X, Square, Triangle, L1/R1 + Triangle, L1/R1 + Square, X, Square, Triangle, L1/R1 + X, O, X, Square, X. Then press START and search the music sheet to find Tifa's Limit break.

Barret: A lady will give it to you in North Coral.

Aeris: Southeast of Midgar there is a small cave with a man living there. Talk to him when you have battled a certain number of battles that end in the same number, such as 122, 133, 144. He will then give you a Mithril orb. Take the Mithril to the Blacksmith's house on the south peninsula near Cosmo Canyon. He will trade you for the limit break manual for the Mithril, or you can choose to have a gold bracelet.

Red XIII: In the Nibel area there is a mansion and on the second floor of this mansion there is a safe. To crack this code turn right 36, left 10, right 59, and right 97. Then the safe will open to reveal a miniboss. Kill the miniboss and you will receive Red VIII's Manual.

Vincent: Land near the waterfall and use the green, black, gold chocobo or the submarine to pass the mountain. Then enter the waterfall. (You must have Vincent in your group and must be done first in disc 2) go forward and it will show Vincent's past. Then leave.

PlayStation

Return if you are already in disc three and you'll get not only the manual but a weapon of Vincent.

Cid: Cid's manual is in one of the chests in the sunken plane.

Yuffie: Go to Wutai and enter the tower with yuffie and let yuffie beat all the bosses including her father and you'll get a manual and Leviathan materia.

Limited Immortality

Connect the Phoenix Summon and Final Attack materia in any linked slot. When your party dies, there Hit-points will be completely restored. This makes killing Ruby, Emerald, and Sephiroth simple, just make sure you have enough Mindpoints to use the Phoenix Summon.

For more punch, add a Final Attack/ Knight of the Round Table to the same weapon. Then when you die you'll resurrect and hit back HARD.

NOTE: This method is limited because you can only use Phoenix materia 5 times.

Morph Enemies Easily

For an easy way to morph enemies, have W-Magic Materia, Gravity Materia + "All" Materia, and Morph Materia. Have someone else cast Reflect on the party, then have the person with W-Magic use Demi 3 on your party twice. It will reflect and hit the enemy six times without killing it, but will greatly reduce it's HP's. At this point, you can easily morph it.

Racing Trophy

When racing S-class in the Gold Saucer, You will notice many keen items you can't ever seem to get. Well you can get them all at once! Just win 15-20 races in a row! Ester will say "I've never seen anyone win so much in S-class before!" She will then give you one of each item, including the coveted Cat's Bell! this trick only works once, though.

Recover Missing Items

Did you miss something important? Fear not. Once you get to disc 3 you can recover anything by excavating for it in the Bone Village.

Recruit Vincent

In the Shinra mansion at Nibbhiem, there is a safe on the top floor. The combination is: Right to 36, Left to 10, Right to 59 then Right to 97. Make sure you don't go to far left or to far right when turning. When it opens kill the monster, then get the stuff in the safe. Descent the spiral staircase and into the coffin room. Vincent is in one of the coffins. Talk to him and leave then come back and talk to him and he will join you.

Recruit Yufie

Near the exploded Mako site there is a small forest. Wonder around in it until you fight a ninja woman. After you defeat her there will be a save point. DO NOT USE THIS or she will run away. Talk to her and tell her you don't want to fight her again. Then tell her your terrified of her. When she asks if you need her help, say "Yes" then tell her that you're leaving and don't ask for her name.

Alternatively, try this. Equip the Enemy Away Materia which can be won in the Gold Saucer Chocobo Racing and a Luck Plus Materia. Go into any forests and wait for a while. Note that the Enemy Away Materia must be at Master Level for a higher percentage of chances to encounter Yuffie.

Reset

Hold L1 + L2 + R1 + R2 + Select + Start to reset the game.

Special Battle

To get to the URA battle (special battle) in the Battle Arena, first gain 64000 battle points and buy the W-Summon materia. Next get 32,000 battle points and buy Cloud's level 4 limit, Omnislash. Equip Omnislash and talk to the lady at the counter in the

battle arena, and she will ask you if you want to participate in a special battle. Beat all 8 enemies and get the Final attack materia.

Note: You must have your Ultimate Weapon equipped to fight in the special battle.

Special Cinema

After Cloud rejoins your party in the second disk, visit the Shinra Mansions Basement again in Nibelheim entering the library. Cloud will suddenly flash back to a special cinematic scene of how you will find out how cloud ended up with his friend Zack's sword. submitted by Nighthawk

Time Attack Contest

At the golden saucers wonder square there is a snowboard game. If you get a good rating on the beginner, expert and crazy course the next time you play there you will see a yellow balloon. Grab it and you will enter time attack mode. In this mode there are no balloons or obstacles and you go extremely fast.

Unlimited Sources

To get unlimited Sources (luck source, magic source, etc.) perform the following actions. Get in the submarine and go to the downed plane. Wander around until you get into a battle and use the morph command on the enemies. The best way to do this is attack the enemies until they are almost dead and then use morph. In this area there are six different enemies and each one morphs into one of the six sources.

Super Strength With Squall

Once your GF's learn STR+10%, 20%, etc. set it on squall. Then junction to his strength tornadoes if you have 100 of them. With the lion heart and a flash-using trigger you could probably do 9999 damage every hit, which would work well with his limit break, Renzokuken

Get Cactuar GF

First before you try to get Cactuar you should be around level 60 and have the Levithian GF. You have to go to Cactuar Island which is in the south-east corner of the Esthar continent. You can distinguish it because of the big green Cactuar that keeps appearing and disappearing on the island, this is the Jumbo Cactuar that you have to battle. You should equip the Revive and Recover Abilities on two different people because the Jumbo Cactuar uses the 10,000 needles ability which can wipe out a character in a single shot. The third person should be able to cast Life or Full Life spells. Also the Jumbo Cactuar is weak against water so use Levithian. The Battle is all about patience because you have to keep reviving your characters and attacking

at the same time plus the Jumbo Cactuar has 60,000 HP. Have one character act as a medic while the other two attack. After attacking the Jumbo Cactuar for a while a little sign will appear saying that the Jumbo Cactuar is hesitating. Stop all your attacks at this point because he may runaway. Just use Levithian and your strongest attacks to finish him off before you! Stop. After you beat him you got the Cactuar GF. This is one of the best GFs in the game. When it's at level 100 he can do 10,000 points of damage and you will never have to boost, ever!

You have to finish the Stellazzio (Zodiac) Quest and keep "Shina's Hammer", which you find in the room after fighting Lich on disk #4. Don't lose, use, or sell/combine the hammer. It has to be present in your inventory for you to get the alternate ending.

Frog Catching Rewards

The frog catching minigame may seem like a stupid waste of time -- but it can actually be a source of some good items and new weapons for Quina, plus the number of frogs Quina eats will power up the "Frog Drop" spell. Here are the rewards:

- 2 frogs: Ore Stone
- 5 frogs: Ether
- 9 frogs: Silk Robe
- 15 frogs: Elixir
- 23 frogs: Silver Fork
- 33 frogs: Bistro Fork
- 99 frogs: Quina's Master appears and fights you; just use standard attack/heal techniques and be around level 40. You'll get the Gourmet Fork for winning.

Get Excalibur I and II

To get Excalibur:
Buy the "Magic Finger" item at the Treno Auction early on. Once you reach Dargelo, give this item to an elderly man you meet there -- and he will give you Excalibur in return.

To get Excalibur II:
This one is way more difficult. You have to get all the way to Hades in under 12 hours. After beating Hades, check the farthest right pillar for the sword. For tips on how to get to Hades that quickly, check the Side Quests section of our strategy guide.

Land Spirits Locations

In certain spots of the world map you'll stumble across a couple of friendly monsters. They are land spirits and each of them will make a request from you. Fulfilling their request enables you to be able to use the "Attack" command when you are fighting Ozma, who's unlocked in the Chocobo Garden by inspecting a large rock on the upper right hand corner.

You'll get Garnet's strongest Summon, Ark, from defeating Ozma but it is a very hard battle, so be sure you find all the land spirits:

Squirrel: Around Dali. Ore stone.
Ghost: In front of Treno (but not too far) or around the South Gate. Ore stone.
Ladybug: Around the Black Mage Village. Two Ore stones.
Yeti: Forest outside Madain Sari. Two Ore Stones.
Nymph: Forest near Iifa. Three Ore Stones.
Jabberwock: Forest East of Oeivell.
Emerald. Feather Suckle: Ice Continent, on the Chocobo tracks. Moonstone.
Galda: Forest outside Gizamaluke Cave after climbing rope. Lapis Lazly.
Yan: Bile Island (small island near center of map). It will keep running away until you have found all eight other Land Spirits. Diamond.

New Carbunkle/Fenrir Skills

Did you know about these Carbunkle/Fenrir skills? Give them a try:
Diamond + Carbunkle = DiaLight
Virgin's Hope + Fenrir = 1000 Year Dust
Moonstone + Carbunkle = Pearl Light
Emerald + Carbunkle = Emerald Light

Quiz Master

Look for a weirdly-dressed character around the Black Mage village. You can recognize him by the circle and an X floating around him. This is the Quiz Master. Confront him and he will ask you a series of 13 questions. For each correct answer you will receive a

ton of AP. Try to answer ALL 13 -- and you'll get a Memory Ring.

Rope Jumping Rewards

At the very beginning of the game, Vivi can participate in a Rope Jumping game in the Alexandria town square. Depending on how many jumps you manage to complete, you'll get a progressively better item. Here are the rewards:

20 jumps: 10 gil
50 jumps: Cactrot Card
100 jumps: Genji Card
200 jumps: Alexander Card
300 jumps: Cat Paw Racket
1000 jumps: King of Skipping Title

Stellazzio Quest

Talk to the lady in the house north of the Treno Combination Shop. She will tell you about a set of thirteen Stellazzio that are spread across the world. Find them all and she will reward you everytime you return. This quest is required if you want to see the game's alternate ending.
Here are the zodiac locations:

Aries: Dali; In the windmill all the way to be back (not downstairs)
Cancer: Burmecia; behind the over-turned cart
Scorpio: Quan Cave spring
Gemini: Fountain at the first screen after you enter Treno; throw coins thirteen times into the fountain.
Taurus: Treno; behind the item shop.
Virgo: Black Mage Village Inn; around the beds
Libra: Madain Sari fountain
Leo: Alexandria (after raid); Left Tower near Neptune Statue
Sagittarius: Linblum; in the left side of the 3d screen up of the Commercial Square.
Capricorn: Dargelo Library; right hand side
Aquarius: Ipsen Heritage; right hand pillar at entrance
Pisces: Treasure chest inside Invincible.
13th Stellazzio: Return to the Quan

Cave that's east of Treno after collecting and returning all 12 coins.

Ultima Weapon

To get the Ultima Weapon, go back to the glacier around where Terra was (before Kujah went gangstah on it) and search around with a Chocobo and a dead pepper.

Final Fantasy Tactics

Chicken Trick

For this you'll need either a mediator or an oracle. A mediator is best. First learn any skill that lowers brave points. Then all you have to do is lower someone's brave points below 10. They'll turn into a chicken. They can't attack, they just run away.

NOTE: They gain 1 brave point every turn, so keep it under 10 or they'll turn back.

Deep Dungeon "Lights On" Trick

If you have been to the Deep Dungeon in chapter 4, you will notice there are no lights. In order to turn them on follow this procedure:

1. Destroy all but one enemy and keep him n stop or sleep.
2. Keep choosing "Wait" for all of your team
3. Pretty soon, the defeated enemies will turn into crystals and will light up the room.

Duplicate Weapons

Set the Ninja "Two Swords" skill on anyone. Equip a shield in their right hand, and the item you want duplicated in their left. Now go to a shop that sells the items you want duplicated, choose "BEST FIT" and buy them. Next, go to the formation screen and remove the items. You should now have two of the item you had in the left hand.

For example, to duplicate Excalibur, go to Lionel castle's shop. You'll get a

PlayStation

second Excalibur for only 10 gold!

Easy Level Gain and Job Points
Before you can do this you'll need to learn ACCUMULATE and (if possible) the JP-UP skill. You also need at least one monk with the CHAKRA skill for this to work.

Walk across any green dot until you are attacked, then kill all but one enemy. Next, find five squares that form an + and are on the same height level. Have the monk stand in the center with all other characters in the adjacent squares. Use accumalte over and over and when your attacked just use chakra to gain back your health. Repeat as desired.

Equipment Tip

When fighting battles against other humans, be sure to check their equipment. Sometimes they have items not available in stores. Use a mediator to invite them into your party and strip them after the battle, or use a thief to steal their belongings.

Gain 5 or More Levels in One Fight

You know how you get exp with one hit? What if your character is so strong, it kills with one hit. What if you can hit someone over 20 times without your guidance and safely return home. What you need is a wizard, and an oracle or mediator.

What you do is you turn your enemies into frogs. It is time consuming, but it is worth it. (You can increase chances by using oracle "pray faith." Once that is done. and I know this sounds weird, turn your strong character into a frog. Then with oracle or mediator, put him into berserk. This will allow him to fight on auto-battle without running away. Keep your character well healed.

Move the rest of your characters far away from the fight. Frogs VS Frogs. Put them on auto battle in "Run like a rabbit" mode so they don't interfere.

They shouldn't interfere.

Leave it on over night. By morning that character will rise 5-10 levels, and have over 2000-5000 jp points.

Get Cloud

This tip must be done during Chapter Four. Not that you should have about six empty spaces in your formation screen before attempting this.

1. Go to Zeltennia Castle and listen to the rumor called "Cursed Island"
2. Buy a flower from Aeris at Zarghidas Trade City then go to Goug machine city with Mustadio. The screen will fade and go to a scene of Mustadio, Ramza and a steel ball.
3. Go to the bar in Goland Coal City and listen to the rumor of the "Ghost of Colliery"
4. After this, go to Lesalia Imperia and the screen should shown a scene of a bar. When you leave, invite Beowulf to join your party.
5. Now that you have Beowulf, go to Goland Coal City and you will fight 4 battles here and save Reis. After you save Reis you will get a Zodiac Stone that will trigger the steel ball.
6. Return to Goug Machine City again and add the Robot to your party. Now that you have the robot, go to Nelveska Temple. You will fight another robot kill him and you will recieve a stone that will bring Cloud to your world.
7. Now go back to Goug Machine City and you will trigger the time portal machine and it will suck Cloud from the future bringing him to your world. Now go to Zarghidas Trade City and save Cloud from the thieves that are punking Aeris. Note: if this part didn't work make sure that you killed Dycerag and his Zodiac Soul Adramelk.

When Cloud joins your party all he can do is defend and attack. You'll need to find his Materia Blade so that he can use all of his limit attacks from Final Fantasy VII.

The Materia Blade is located in the Bervania Volcano. Set your party's on Move-Find Item Then go to the highest tall rock and go to the top of it.

How to get the Chaos Blade

On level nine of the Deep Dungeon you should fight a team of ninjas. Ready your CATCH ability. If you're lucky, one of the ninjas will throw a Chaos Blade at you. If you catch it you get to keep it!

Immortal Female

To have a female that cannot turn into a crystal or treasure box, you must have the Chantage perfume (stolen from Meliadoul in Chapter 4) and a character skilled as a ninja, or have a Vanish Mantle as an accessory.

Put the Chantage perfume on any female character, and make sure the Ninja has the reaction skill of Sunken State (or equip him/her with the Vanish Mantle)

Go into battle, and hit the Ninja until he uses Sunken State (unless he has a Vanish Mantle) then make your Ninja run away after it is transparent (not acting!)

You will notice that your female character, after dying will be revived as soon as her AT reaches 100. This will happen every time she dies! It is better to have someone like Agrias use this technique!

Instantly Kill Undead

To instantly kill an undead (ghouls, skeletons, etc), simply throw them a Phoenix Down. You will never miss and they'll die instantly!

Warning: When you kill undead this way a timer will appear. If you don't finish the game before the timer reaches 0 the undead will rise again.

Mime Job

The requirement for the job mime is level 8 item user, level 8 beginner

PlayStation.

knight, level 5 summoner, level 5 talker, level 5 Fu-sui-shi (Element user) and level 5 dragon knight.

Mini-Games - Japanese

Sometimes when you go to the bar and accept a mission, you will get a book. You can use that book to play a little mini game. There are four books in all.

Note: This tip only works in the Japanese version.

More Powerful Ramza

For a more powerful Ramza, have him master the squire class then switch him to the ninja class and have him master that too. Then return him to the squire class and equip him with the two swords ability. Because of his special squire abilities he can wear heavy armor and helmets. Because of his natural H.P bonus in the squire class his max H.P should go up almost 100 H.P! This tip works best in late ch.3 to ch.4.

NOTE: When you get T.G Cid at the end of the 3rd. chapter, duplicate his excalibur and put one in each of Ramza's hands. If he is at a good level and has a high attack power, he can attack for 350+ points of damage each hit!

Music Test - Japanese

In the Japanese version, enter your name as B-G-M-Ki-Ki-Ta-I to access the Music Select screen.

Raise Bravery Permanently

When you reach chapter two, purchase the Square ability CHEER UP for Ramza. Once you've acquired it, go into battle and use it on everyone on your team. It will temporarily raise their BRAVE by 5 points, and provide a permanent 1-point increase.

You can get your Brave up to 97. This works great if you have the Blade Grasp skill because the enemies will only have a three percent chance of hitting you!

Ultimate Summon

After beating the battle in the holy land of Myurond, go to the seaport Wo-jirius. Following an short event you can go into Dieve dungeon, and from the tenth floor of the basement you will be able to learn the ultimate summon (equivalent to Knights of the Round from FFVII.)

Weigraf and Velius:

Two Birds with One Stone!

When you encounter Weigraf for the last time(just before he becomes Velius) you can kill him easily by following these instructions:

Make sure Ramza is a Squire with two sword ability or a Ninja with HP Restore and the support skill Guts equipped.

When you start the battle it's just you (Ramza) and Weigraf. Don't attack him, instead keep away from him and use Yell and Accumilate repeatedly when it's your turn.

Eventually this will raise your speed and level high enough that you don't have to worry about his Lightning Stab or Earth Slash attack.

When you are getting 3 to 4 consecutive turns in a row (Check the AT list) wait until the beginning of the next cycle then attack. Your two-sword ability should kill Weigraf in one turn and Velius will be dispatched before anyone else even gets a turn.

This should make what was the hardest battle in the game quite simple. Good luck!

If you select ability and it gives you a list of abilities you can learn, (fire, fire 2, fire 3 etc, I discovered a way to get every ability there. The car the player drives (and the class it is in.)

The number of consecutive wins that car has achieved prior to a given race. The course on which the race occurs. Most of the time, bonuses vary by one class. Thus, a Class-B victory is likely to be awarded with a Class-C, Class-B or Class-A bonus car.

Metal Gear Solid

Extra Modes

The regular game is excellent, but the built-in VR Training mode is a definite must.

At first there is only one choice, Practice. Finish all 10 stages, then you gain Time Attack, where the difficulty is heightened a little, but shouldn't be a problem besides the time limit.

Complete these 10 and you gain Gun Shooting mode, in which the difficulty is at max, and you HAVE to kill ALL the guards to progress within the time limit. You are given a Socom regular gun with suppressor silencer and 5 bullets per guard. If you run out of bullets, you'll have to choke your way out.

If you can finish these 10 stages, one last stage can be chosen, Survival Mission, where you rush through all 10 stages one after another, in under 7 minutes. You start with 30 bullets and dead guards drop bullets. Good luck, if you can complete this, you are a true Metal Gear Solid Master.

Get the Bandana

To get the Bandana, which gives you infinite ammo and no auto re-loads, play up until you get to Ocelot's Torture Rack. If you make it out of The Rack without dying or giving up, when you beat the game, you will get the Good ending, where you save Meryl. She will give you the Bandana, and then once the credits are through, you can save your game. Save it and then load it up again. Look into your inventory and you will see the Bandana.

Get the Camera

To get the camera, when you get a Level 6 keycard go to the first building (Tank Hanger), Then take the Elevator down to Basement 2. Go into the hall before the Room where you fought Ocelot. Then there should be a spot where you can blow a hole in the wall with C4, when you blow it up there are

two rooms, The camera is in one of the rooms, and there is ammo and a ration around in there also.

Ghost Images

First, you need to obtain the camera either by [A] Finishing the game with the ending where Meryl dies and starting that newly created save file with the camera automatically in your inventory or ...

[B] Getting at least as far as defeating Liquid Snake in the hind helicopter sequence, then going to the room located in Base 1, floor B-2 with a Level 7 cardkey where there are two autoguns you will have to use C4 explosives to the wall below and to the right of the bottom entrance to the room where you fight Revolver Ocelot -- in one of the two rooms here, the camera is located in the top one. BTW if you run into a jammed door that you should be able to, try using a C4 explosive on it and trying to it then.

In either case, here is how you see "Ghosts". Make sure you have at least 2 blocks free on a memory card to save at least one picture. Take pictures of different things and you may find a "Ghost" image of different programmers, artists, etc. superimposed on your new snapshot. I've found two by taking pictures of the ravens on the last major elevator and one by snapping a shot of the dead guy in the prison cell.

Start a new game on normal difficulty. Don't pick up anything. When you get to the gate that leads to the police station go down the stairs. Down there will be Brad Vickers, the pilot from Resident Evil (he's a ZOMBIE!) Head past him and go up the stairs. Get the herb from the bushes closest to the stairs. Go in the R.P.D. and get the bullets at the desk in the back of the room. Go back to Brad and fill that dumb zombie full of bullets. Inspect him and take the special key.

When you get to the dark room there are some lockers, use the key to unlock one and get the costumes. With Claire you get a cool denim jacket and the Colt S.A.A. gun. With Leon you either can choose a leather jacket with a skull on the back or a tank top and a baseball hat.

Play as Tofu

To play as Tofu you must beat 6 scenarios with an A ranking. Tofu's mission is the same as Hunk's -- get to the rooftop from the sewers. However, it's much harder this time as Tofu is only armed with a knife and cannot use guns!

To get an A ranking, beat the game in under three hours and don't use any First Aid sprays. (You can use herbs, though.)

To get a B ranking, just beat the game in under three hours.

Silent Hill

Ending Bonuses

There are four endings to Silent Hill, each with its own set of bonuses.

BAD ENDING- Prizes: Gas tank, Chainsaw, Rock Drill.
The Gas tank is found in the gas station. It is used to power the other two prizes, but only one of the two weapons can be taken. The rock drill is in the room under the drawbridge control room. It's not very good.
The Chainsaw is in the smashed window of cut-rite chainsaws, and is a lot better than the rock drill.
These two weapons are useful against slow ground enemies, but the hammer works better, and you don't need to beat the game to get it.

BAD+ ENDING- Prize: Katana.
This is found in the previously locked room in the Dog House on Levin Road. It WAILS any slow moving ene-

mies, and you lunge forward with every stroke. Hold the circle button for an overhead blow, and tap twice for a double slash. You can perform a 3-hit combo by holding the circle for the first hit, then rapidly pressing it.

GOOD ENDING- Prize: Hyperblaster
This gun is just plain cool. It's megapowerful and has an unlimited supply of ammo.

GOOD+ ENDING- Prize: Channeling Stone.
Found in the convenience store. Who knows what it does or where to use it.

Extra Options

During game play, hit the select button to bring up the Item screen, then go to Options. Once you're in, push any shoulder button. If done correctly, it opens a small menu where you can change the color of the blood, reverse some of the controls, and turn off auto-aim.

See UFO Ending

To get the secret UFO Ending, first you must get the Good+ ending. After you've done that, start the Next Fear game. Go to the convenience store (before going to the school). On the counter is the Channeling Stone. Pick it up. There are five places to use the Channeling Stone. All five times it will look like night.

The first place is at the roof of the school. This would be at the other school, since you can't get there in the first school. The second place is in the hospital courtyard. After the other church, but before you fight the moth. The third place is in the parking lot of the hotel. Oh, and don't worry about saving Kaufman. You won't get a chance to on the UFO ending. The fourth place is in the boat. Not on the deck of the boat, but inside the boat. The place where you see Cybil and Dalia. The fifth, and final, place to use the Channeling Stone is on top of the Lighthouse. After that, be prepared for

the true ending of Silent Hill (because this one makes more sense than the others).

NINTENDO 64

Animal Forest (Import)

Bee Courageous

You've done it before -- you've shaken a couple of trees to find some cash, and out comes a whole swarm of bees and does a "remodeling" job on your face... Painful. But did you know that you can actually catch the bees and make some money? It's a bit tricky as the bees move fast, but after you've shaken a tree and a bee's hive has fallen out, immediately switch to the butterfly net and turn towards the hive. Time it right and hit the button and you will catch a single bee, worth 4,500 bucks. Not bad, huh? There are three swarms of bees hidden on the map every day, so you can make some big bucks if you go bee hunting.

Fuusui Mysteries

Are you familiar with the ancient art of Fuusui (Feng-Shui)? Who would have guessed that it even applies to Nintendo's Animal Forest? It's all about how you arrange your furniture in your house.

Orange colored furniture in the North
Yellow furniture in the West
Red furniture in the East
Green furniture in the South
What does this do? For example, the yellow furniture increases the amount of money you receive. The other colors have similar benefits, so be sure to follow this basic rule when constructing your house.

Grow a Money Tree

Did you know that besides growing fruit trees, you can also grow money trees? Yep, no joke. However, you can't just grow them anywhere. Find a sparkly glowing spot on the ground (the type that hints at a hidden treasure) and use the shovel to unearth the money bag. Instead of just pocketing the money and closing the hole, stand in front of it, go into your inventory and select the money bag. Now choose the "plant item in ground" option that you also use to sow seeds or fruit and

put the bag back into the sparkly spot in the ground. A seedling will sprout, which will grow into a money-bearing tree. Nice, huh? Note that planting a money bag just anywhere will not produce a money tree. It has to be planted in the sparkly special spot.

Reset Follies

Don't ever hit the reset switch when playing this game. If you do, the next time you play you will be chastized by Mr. Reset, an angry mole. He will lecture you on how there is no reset button in real life -- so you shouldn't use it in this game either. Mr. Reset's rant takes quite a while to get through, but that's nothing compared to what happens when you hit reset again... His complaints will get longer and longer and he will even force you to apologize (which requires you to manually enter your apology via the letter entry wheels). Not fun. So stay away from the reset switch unless you understand Japanese and want to read some funny stuff.

Win Famicom Games

Animal Forest features a variety of Famicom (NES) games. You have to be lucky to get your hands on them though. One way to get them is to enter the monthly lottery at the Tanuki Store on the last day of the month. You get a lottery ticket for every major purchase you make at the store (stationary and plants don't count). Every five tickets let you play in the lottery once, so be sure to collect a bunch of them. Note that lottery tickets don't carry over to the next month. They're only good for the current month.

Banjo Kazooie

Banjo-Tooie

"Stop'n'Swop" Secrets

Did it drive you nuts that Rare hid secrets in Banjo-Kazooie that could only be unlocked through Banjo-Tooie? Well, someone finally figured how to open up the hidden stuff. By using the following cheats, you will be able to

raise Sharkfood Island, get to the Ice Key and collect all the secret eggs -- but there is still one question left to be answered. What the heck do you do with them? Alas, we don't have an answer to that question quite yet... Whenever you collect one of these special items, they get added to a "Stop'n'Swop" inventory screen. Rumor has it that Rare came up with a way that lets you pull out BK while your N64 is still on and quickly plug in Banjo-Tooie. However, rumors from within Nintendo also suggest that the Big "N" wasn't thrilled at all about this technical feat and wanted Rare to get rid of the feature. Whatever the truth is, we still don't know how BK and BT connect. Until we find out, you can at least collect all the hidden goodies to get ready for the big day.

Go to Banjo-Kazooie's Sandcastle in Treasure Trove Cove and start off by spelling CHEAT. Every letter you hit will make a "moo" sound to confirm that you did it correctly.

After you spelled CHEAT, you will be able to enter the following lengthy cheats to unlock the hidden stuff. The cheats are pretty much self-explanatory. Note that the letters won't make any noise.

To open the locked gate in the rock wall in Gobi's Valley, enter the following cheat. You will find the Blue Egg inside.

A DESERT DOOR OPENS WIDE ANCIENT SECRETS WAIT INSIDE

To raise Sharkfood Island in Treasure Trove Cove, enter the following sentence. You have to work yourself up to the top of the hill inside -- to get the Purple Egg.

Refill Eggs, Red Feathers, and Gold Feathers At Once

Once you have all three Cheato book codes, you can go to the floor of the Sandcastle and enter these letters to refill everything all at once: BLUERED-GOLDFEATHERS

Warp Cauldron Locations

The warp cauldrons transport Banjo-Kazooie to other locations in Gruntilda's Lair. The time it takes to get to certain levels can be noticeably reduced.

There are four sets of cauldrons.

PURPLE: The first purple cauldron can be found through a passageway in the area where the Treasure Trove Cove jigsaw puzzle is located.

The second cauldron is located in the area prior to Freezeezy Peak, where there is a large witch's head. It can be found tucked in a cave that is hidden behind a spiderweb. Use eggs to destroy the web.

BLUE: The first blue cauldron can be found near the second purple cauldron is located. Go to the top of the spiral walkway, where there is another spiderweb on the ground. Shoot eggs out your rear to destroy the web.

The second blue cauldron is located in the area with the entrance to Rusty Bucket Bay. It is near the top of a bunch of stacked boxes.

RED: The first red cauldron is located inside the pipe below the passageway heading to Clanker's Cavern (also the same area where there is a passage to Treasure Trove Cove).

The second red cauldron is tucked away in a passage at the bottom of the hill before Click Clock Wood. There are two entryways and they are just barely visible above the grass.

YELLOW: After beating Gruntilda's gameshow go up the spiral staircase to find the first cauldron. The second one is behind the starting platform for the gameshow.

Cheato's First Spell Book

To enter Cheato's first lair, go into Bubbleloop Swamp and find Mumbo's Hut. (To find Mumbo's hut, go above the gator's head into the maze and you'll have to find his hut.) He will transform you into a gator. Now exit Bubble Gloop Swamp and go into Gruntilda's lair. Try to go BEHIND the entrance to Bubble Gloop Swamp. If you successfully go behind puzzle to Bubble Gloop Swamp, you'll find Cheato the Spell Book.

Cheato's Second Spell Book

Go to the level MAD MONSTER MANSION. Change to the pumpkin and go to the platform that BRENTILDA is on, go through the little hole and get the red spell book. Then go to the BANJOKAZOOIE puzzle in TREASURE TROVE COVE then enter RED-FEATHERS to get 100 feathers and a maximum of 100.

Cheato's Third Spell Book

To find Cheato's 3rd spellbook, you have to have the water risen to the 2nd level before you can race to the lair. Find the switch to raise the water to the third level (behind a grated pathway behind the 460 note door when the water has risen the first time.) Go through the door then immediately dive down in the water and go to the Rusty Bucket Bay area and swim to the top after coming out and look for a staircase and that will lead you to the lair.

Note: After hitting the switch to raise the water to the third level, you'll only have 30 seconds to get your furry hide to the lair.

Bug Repellant

First put in the code for unlimited gold feathers (you don't NEED to but, it helps). Then, while using the Wonderwing, break a honey case. Keep Wonderwing on and wait for the bees to begin to attack you. They will die instantly (and rather humorously) and will never pose as a threat to you.
submitted by Alex J. Sandoval

Double Health

If you have enough notes, open the 882-Note Door, then stand on the puzzle piece platform. By completing the picture with four of your Jiggys, your Honeycomb Energy Meter will turn red. From then on, your Honeycomb Energy will be twice as strong. In essence, one red Honeycomb Energy Piece will represent two pieces on your meter, so one hit will turn a red piece yellow, and a subsequent hit will completely deplete the piece of energy.

NINTENDO 64

Jumping Tip

As you know, there are three types of jumps in Banjo-Kazooie. In all three, if you press the ATTACK button during your jump you'll travel a little farther than you normally would.

Less Damage From A Fall

To take less damage from a long fall, press B just before you land.

Rusty Bucket Bay Whistle Combination

The combination for the whistle game in Rusty Bucket Bay is 312-111. It's written on the side of the ship, in case you forget...

Banjo Tooie

Various Game Codes

In addition to Cheato's Cheats, which require you to find Cheato's pages, there are tons of hidden codes that are entered virtually the same way. Simply go to the Code Chamber in Mayahem Temple and stand on the platform in the middle.

The use these codes, you first need to spell CHEATO, then enter the respective codes by shooting eggs at the letters. Note that the eggs don't make a sound when they hit the letters -- but you will get a confirmation noise once you have entered the whole cheat. Like with Cheato's cheats, you need to activate the codes by using the plaque on the wall. These codes are similar to Cheato's passwords, but spelled backwards (the original word is listed as a reminder):

Gameplay Codes

SREHTAF: Doubles the amount of feathers you can hold.
SGGE: Doubles the amount of eggs you can hold.
FOORPLAF: You become immune to damage from falling.
KCABYENOH: Refill your energy bar gradually after taking damage.
XOBKUJ: Enables the Jukebox in Jolly Roger's Lagoon.

YGGIJTEG: Activates the "Jiggy location" signs in Jiggyswiggys Temple.
GNIMOH: Get homing eggs.

There are also a couple of Special Codes that activate features you can't get from Cheato or by normally playing through the game:

Special Codes

JIGGYWIGGYSPECIAL: Opens up all worlds (Level Select Code)
NESTKING: Get infinite Eggs and Feathers
SUPERBANJO: Banjo will move faster.
SUPERBADDY: Enemies will move faster.
PLAYITAGAINSON: Unlocks all the cinemas in Replay Mode.
JIGGYSCASTLIST: Watch the cast list "Character Parade".

Dragon Kazooie

Did you know that there is a way to turn Kazooie into a dragon? You will need the Ice Key, the Mega Glowbo and Kazooie's Talon Torpedo Move for this transformation.

To get the Ice Key, go to the Jinjo Village area of the Isle O' Hags and head for the sandy area near the lower Jinjo Houses. Grip Grab the ledge that winds around the left side of the green rocks and enter the cave there. At the end of the cave will be the final Game Pak. Smash it and grab the Ice Key!

Next, you will need the Mega Glowbo. Head to Gutter Gulch Mine, grab the Turbo Trainers (sneakers) near the entrance and go to the start of the river that runs through the level. Step on the switch to open the gate and follow the stream to its end (you can walk on water when you're using the Sneakers). Enter the cave and jump down to the very bottom of the cove. There is a boulder underwater marked with Kazooie's face that you can only open with the Kazooie Torpedo Move (press Z while you're underwater). If you've got it, you can bust open a tunnel leading to a giant ice door which can be

unlocked with the Ice Key. Inside, you will find the famed Mega Glowbo.

With the Mega Glowbo in hand, head back to Pine Grove (the Witchy World Hub) and pay a visit to Humba Wumba. She will now transform Kazooie into a green, fire-breathing dragon. Kazooie will remain in this form until you return to Humba Wumba and have her transform her back to bird form. Although Dragon Kazooie is virtually identical to standard Kazooie, she now has a handy fire breath move that you can use by pressing B.

Not only is Dragon-Kazooie way cooler looking than the standard breegull, it's also got this handy fire-breath move.

Mysterious Signs

Getting confused by the mysterious signs in Jiggyswiggys Temple? All they say is "When fortune smiles, here will be written the Jiggy secrets." There is actually a hidden room in this temple with a sign that hints at how to make the signs active: "Witchyword is where fortune may smile upon you." To see this room, simply walk through the mural behind Jiggyswiggys. The solution is to go to Grunty's fortune teller tent. She will eventually give you the "GetJiggy" cheat (see Codes). This unlocks the signs in Jiggyswiggys Temple that give you clues about all the Jiggy locations in the game.

Character Parade

Once you collect all 90 of the Jiggies in Banjo-Tooie you will unlock a "Character Parade" mode for the "Cinema" options feature. Every character that appeared in Banjo-Tooie returns for an encore curtain call. If you don't have as much time as Fran -- but you still want to see the Character Parade, you can also use the JIGGYSCASTLIST cheat listed above.

Cheato's Cheats

If you've been paying attention to your surroundings while playing the game, then you should be actively collecting

NINTENDO 64

Cheato's ripped out pages. For every 5 Cheatos you collect, Cheato will tell you another cheat. To activate these Cheats you must enter them in at the Code Chamber in the Jade Snake Grove area of Mayahem Temple (must use Golden Goliath to kick doors to Code Chamber in). Anxious to see what you'll get? Then look no further.

Feathers: This cheat will double the amount of each type of feather you can carry. This is particularly helpful when battling the bosses at Grunty Industries and Hailfire Peaks.

Eggs: This cheat, like Feathers, doubles the amount of eggs you can carry. This will help out tremendously with Clockwork Kazooie and Grenade Eggs.

Fallproof: With this Cheat activated you will not take any damage from falling from unusually high places. This will become very helpful when bounding around the summits of those Hailfire Peaks.

Honeyback: The closest thing to being permanently invincible you can find. The Honeyback cheat will slowly and continuously refill your depleted energy bar. Very, very helpful when fighting Mingy Jongo and the Hag 1!

Jukebox: Not really a cheat, but cool nonetheless. With Jukebox activated you can head back Jollys Inn in Jolly Rogers Lagoon and use the jukebox to play any of the songs you have heard in the game.

GetJiggy: This will make the signs available in Master Jiggyswiggy's house.

Homing: The eggs will home in on the nearest enemy.

NestKing: With this cheat you will have unlimited eggs and feathers.

Game Paks

In a couple of really well hidden spots lie Banjo-Kazooie Game Paks. Game Paks are little creatures that bounce around gleefully, trying to keep their contents away from you. Bashing them open will reveal one of the harder to find items in the game for sure. Although there are only three of them, one of them contains the infamous Banjo-Kazooie Ice Key!

Game Pak #1

Return to Spiral Mountain when you have both the Airborne Egg Aiming and Grenade Eggs abilities mastered. Take to the air and fix your sights on the cracked screen covering the cave above the tree stumps. Blast it apart with a Grenade Egg and touch down inside the cave to find the Pink Special Egg. Heggy will hatch this egg for you, provided you ask nicely. This will unlock your Skinny Bird Bash ability. Don't ask. You gotta try it for yourself.

Game Pak #2

This Game Pak is also in Spiral Mountain although is a little less obvious. Fly over the waterfall and enter the cave from which the water flows. This leads to an area appropriately titled "Behind the Waterfall". Follow the ledge to the smaller waterfall in the rear of the cave and Grip Grab the ledge to climb up behind this second waterfall. There you will follow a tunnel that leads around to the Game Pak within the cage. The Blue Special Egg can be obtained here. Return to Heggy's Hen House to have her hatch this one for you as well. Homing Eggs are your reward.

Game Pak #3

The final Game Pak is the most important of all as it contains the Ice Key! Head to the Jinjo Village area of the Isle O' Hags and head for the sandy area near the lower Jinjo Houses. Grip Grab the ledge that winds around the left side of the green rocks and enter the cave there. At the end of the cave will be the final Game Pak. Inside, you will find the fabled Ice Key. Follow the

instructions under "Dragon Kazooie" to see what you can do with it.

Multi-Player Jinjo

Ok, all of this talk about Heggy's Hen House has likely got you wondering what is in that egg up top. Well, once you learn the Hatch move in Terry-dactyland head back to Heggys place, Bill Drill the object on the Split-Up Pads, Split-Up ad have Kazooie Hatch it. Inside you'll find a Jinjo that can be used when playing multi-player.

Drive Submarine on Land

Okay, this may be useless, but it's still kind of neat. Have Humba Wumba transform you into the Submarine in Jolly Roger's Lagoon. If you try to warp back to the Town Square, you will be told that submarines can't operate outside the water. Not true! You can take the sub manually up to the surface and drive up the slope. The underwater craft actually handles quite well on dry land. Sadly, you can't get up the stairs -- but you can hop into the pig pool and explore the docks at your heart's content.

Conker's Bad Fur Day

Conker's Cuss Filter Fun

Enter the Cheat code screen (from the "Cock & Plucker" main menu) and enter in any popular cuss word you can think of. In return, you'll get some seriously funny comments from the game.

Use Conker in War or Race Mode

Go to the options menu and enter the cheat code screen. Enter: WELLYTOP

That's about it, once your at the menu you can access the Stack Numbers (that's cool and everything but does nothing for you). 9 out of 10 times I

tried this the game crashed and then when I finally got it to work there was nothing for me to do when I got there. So you can try this trick but i will not benefit you in any way.

NINTENDO 64

them that give you extra lives. But did you know that these tails actually respawn when you leave an area? So in this instance, to get unlimited lives simply grab the tail and leave the stage by going back to the first stage. Return to pick up your second tail -- and repeat as many times as you like.

First you need to have Tiny and need to have her ability to shrink in size. When you have all of that, get Tiny and swim to the island that looks like a big fairy. Original Donkey Kong Game

In the level in K.Rool's ship, Have D.K. learn the move of pulling a lever (from Cranky). Then go down the crates, left, up a rope (that's wooden), then follow the pipes to a room with a lever. You will see an arcade machine next to the lever. Pull the lever then the arcade machine will turn on. You are now playing the original Donkey Kong.

X-Cup Track Generator

Beat all four cups on Expert difficulty to open F-Zero's hidden X-Cup. This cup will randomly generate six courses, ranging from utterly boring to plain cool. Beating the four cups will also open a Master Difficulty level.

Gauntlet Legends

Easy Experience

Go to any level you like, and find a set of stairs or any other path leading up a hill with a generator at the top. Wait at the base of the path or flight of stairs, aim for the top of the path, and hold down the attack button, you will constantly be hearing the monsters coming from the generators growl. Watch your experience, it will constantly be raising. When your experience stops going up, that means the monsters have given up, hit the generator once and run back down the path and start over again. This strategy doesn't work very well with the smaller monsters.

Funny Names

Enter your name as "Sumner" or "Skorne" on the change name screen. If done correctly, you will hear a strange noise. After this, your name will change into something interesting like "Q#.@", which cannot even be entered, because there is no #, ., or @.

Locations of the Legend Weapons

In order of when you get them:

(1)Scimitar of Rasha-The Caverns in the Mountain. Somewhere in the middle of the area, there is a route with a path to the right and a switch at the top, if you hit the switch, a rock will rise up leading you down to the sword, but in a hidden wall, a switch puts a

rock in the lava river blocking you from the Scimitar of Rasha. After you hit that switch trace back to the other switch which leads you to the Chimera killer.

(2)Ice Axe of Untar-The Castle Treasury. Near the beginning of the level, you can see the axe in plain sight on a tower, you have to hit countless switches for the tower to lower to get the Dragon slayer.

(3)Flame of Tarkana-The Town Spire. At the start of the twisty climb, shoot the wall to the right and a switch will appear, hit it and near the middle of the twisty climb, there is a fake wall that you can shoot. You will see the burning scroll behind a gate. Shoot the pile of sand to the right and hit the switch under it, it will make a wooden platform rise with a switch on it. Hit that, and another platform will rise. Then hit the switch on that platform, then go back to the Flame and the pile of sand to the left will be gone, revealing a switch. Hit the switch to get the Flame which will help you against the Yeti.

(4)Marker's Javelin. The Ice World's Fissure. Near the end of the level, you will see the javelin in a waterfall, but you need a space to walk on to get it. Go to near the middle of the level and you will find an ice block. Shoot the left end and hit the switch on the other side. Now go to the top of the ice block and hit the switch. Now claim your javelin and defeat the Plague.

(5)Skorne's Weakness. The Towers in the Battlefield. Near the beginning of the level you will see a hole in the top of the tower with a red disk inside. I'm not exactly sure how to get it, but hit a plethora of switches and eventually the platform which supports the disk rises and is yours to keep.

Permanent Anti-Death Halo

To receive an anti-death halo from Sumner (note: on your item menu it will

only say one, even though it will last forever), you must defeat the second Skorne. To get to him, you must collect all 13 rune stones and beat every level. Once you do that, step into the complete circle of rune stones and a fire will appear. Soon you will be transported to the underworld. After you beat him you will receive the halo.

Play as the Falconess

To get the secret character "The Falconess", which has the same turbo attacks as the valkyrie, go to the Bonus Stage in the Castle World. Get 50 of the coins there and then you can select "The Falconess" from the character select screen.

Play as the Jackal

Play through the second level of the ice world. At the end, on top of the pile of crates, there is a trapdoor at a dead end. The trapdoor is found by climbing the slanted crates to the top, then circle around until you get a chance to go back down. From there, climb the other set of slanted crates, located before the exit, and standing atop the trapdoor. Inside the door, collect 50 tokens to unlock "The Jackal", a more powerful form of the wizard.

Play as the Minotaur

In the forth mountain level, find every switch and the go to the area with the exit. Instead of going through the exit stand on the door with the skull on it. Inside the bonus round collect 50 coins. When time runs out you can now play as the Minotaur.

Play as the Summoner

Get all of the shards and beat the 1st Scorn. Let the doors open and go to the first area. When you get to the exit go to the left and follow the wall. You will find the gate. Get 50 Summoner coins in the area. It will be hard to see, because you only have a small light radius, just follow the path. submitted by Legendary Wing

NINTENDO 64

Play as the Tigress

You will have to go to the first town level. Find all the main switches and head to the portal. When you reach the portal backtrack a little bit till you reach a hill with a chest, a switch, and death on it. Avoid death and hit the switch. Head in the position the switch is pointing and you will be lead to some zombies and the trap door. Stand on the trap door and collect 50 coins to unlock the Tigress.

Prolong "Time Stop" and "Shrink" Effects

When you are about to die activate, "time stop" or "shrink". After you die, continue and go to the desired level. This code will not deactivate until you turn the "time stop" or "shrink" on again or you quit.

Same player on Multi-player

You will need a memory card to do this trick. first save the character you wish to have, load the game and give the other player the same memory card. Have them load the same game on Multi-player, then you will both have the same character with the same money, same strength, and EXP.

Super Rapid-fire Trick

Find an enemy. Walk up to him, and attack him by walking into him. Right after you start attacking him, hold Z. Then turn around and start walking. If done correctly, you will be walking very slow and firing very fast. This is good for killing large groups of guys without magic or turbo (this doesn't even use turbo!).

Try doing this around generators. Sometimes, when you are walking slowly around like that, if you watch a generator, you will see that the guys are hit by you right after they come out, even though you are not aiming at them. I have gotten this to happen to me with 3 generators at once. I watched my experience screen, and could hear and see 3 distinct rhyth-

mic hits every second or so. Very good for quick leveling up.

Also try doing this on scorpions or other small creatures. Then you get to walk around very slowly kicking air. Very odd.

Turn Poison Apples to Good Apples

If you find one of those evil poison granny smith apples you can turn it into a regular apple by using a potion. Just throw it down and make sure it's within the blast radius. This is good if you need the health and have an extra potion or two.

Weapon Upgrade

Upgrade your character to level 10 and your character's weapon will grow in size and do much more damage. This also works at levels 75 and 99.

Bonus Weapons

For bonus weapons, complete any of the levels below.

Magnum: Antenna Cradle
Laser: Aztec Complex
Golden Gun: Egyptian Temple

Double Assault Rifles

In the caverns stage, there is a box in the right corner of the room where you contact Jack Wade. If you shoot this box then a smaller one inside of it appears. Keep shooting the smaller boxes until you see two monitors. If you shoot the monitors they each give you an Assault Rifle. Now you have two AR33s, making your shooting ability twice as powerful!

Flaming Bond

This code requires that you have the invincibility cheat. Go to the Silo level with invincible Bond on. Select the plastique explosives from your watch and throw it on the wall. Now, shoot the explosives with your gun. Wherever you run, the explosions will follow you and kill everything in your path.

Golden Gun Room

When you enter the Golden Gun room on the Egyptian level, do this. Step on the first lit block, then go Left 2, Up 2, Right 3, Up 2, Left 1, Up 1, Left 1, Up 2, and Right 1. After you get to the case in the middle of the room the bullet proof glass lowers and you can pick up the Golden Gun and some ammo. If you look down it makes the whole process easier.

Invisible Mines

In multiplayer mode select remote mines. Throw some on an ammo box then pick up the box. The mines appear to be gone but press your watch and ... BOOM!

For a sneakier kill, choose Proximity mines. Find any ammo box and look down at it when you pick it up. Then lay a mine right where the box used to be. In a short time the box will come back

NINTENDO 64

covering the mine until someone picks up the box then BOOM!

Movie Cover

To see the movie cover of GoldenEye, go to the bunker 2. When you get the CCVV tape, hit START and go down your list of stuff until you come to the tape. Push START twice. This time on your watch should be a picture of GoldenEye the movie!

Run Faster

Want to run faster in GoldenEye? No problem: when you run diagonally (e.g. hold 2-C-buttons at once and look 40 degrees to the right/left) you run faster. It's just the thing to shave off those extra seconds for those time-activated cheats.

Tank Cruise Control

On the tank levels (Runway and Streets), you can put your tank on cruise control. Simply push the stick forward a bit to move the tank forward ever so slowly. Any tank speed will work, but if it's moving slow you can aim easier. With the stick forward, hold down the aiming button and Voila! You can now let go of the gas. the tank will continue to move forward and you can now swing the turret around and blast away!!!

Masks Locations

One of the key aspects of the Legend of Zelda: Majora's Mask are the unique masks that Link will find throughout the game. Some will transform Link into new forms, while others have very limited uses. There are a total of 24 masks in the game, and you can find them listed below:

1. Deku Mask: Link begins the game with this mask. As the Deku Shrub, he can hop on top of water a couple times, as well as shoot bubbles at enemies. Also, the Deku Shrub can burrow into flowers and then shoot into the air gliding down slowly. Controls: A: Spin B: Shoot bubble

2. Bremen Mask: Link receives this mask from the weird guy in the Laundry Pool area of Clock town at night during the first or second days. It is used to herd chicks in the ranch, which will get you the Bunny Hood.

3. Great Fairy Mask: You get this mask by returning the second lost fairy to the Great Fairy. It can attract Stray Fairies in dungeons.

4. Bunny Hood: When wearing this mask, Link runs at an increased rate. You get it by using the Bremen Mask and herding all the chicks in the Chicken Coop of the ranch during the day.

5. Mask of Scents: Follow the Deku through the tunnel (use the Bunny Hood to keep up) that is to the left of the Deku Palace. The mask can detect scents such as mushrooms.

6. Goron Mask: Play the Song of Healing for the old Goron ghost after following him to the Goron Shrine. The mask turns Link into a Goron, complete with increased size and strength. Controls: A: Curl (hold down A, and then press up to build speed) B: Attack If you hold down A and then press B, you will do the Goron Stomp.

7. Romanis Mask: Complete both Romanis and Cremias notebook entries. This mask gives you access to the Milk Bar in Clock Town.

8. Kamaros Mask: Play the song of healing for the guy dancing on top of the mushroom to the north of Clock Town. He is only there at night, and the mask allows you to dance.

9. Blast Mask: Stop the thief after midnight during the first day in North Clock Town. You can blow up objects using this mask just like a bomb, but you will lose one heart per blast.

10. Kafeis Mask: Speak to the woman in the Mayors House in East Clock

NINTENDO 64

Town. Used in a couple notebook quests.

11. Captains Hat: Defeat the sleeping skeleton in the graveyard. The Hat allows you to speak to the undead.

12. Mask of Truth: Complete the first Spider Dungeon. It allows you to speak to the weird stones around the world.

13. All Night Mask: Stop the thief on Day 1, then buy it for 500 Rupees from the curiosity shop on Day 3. It allows you to stay up late and listen to the old lady's stories in the inn.

14. Stone Maske: Use the Lens of Truth near the entrance to the graveyard to find a soldier. Give him a red potion to get the mask. Some enemies will not notice you while wearing this mask.

15. Keaton Mask: Go to Kafeis house in the afternoon of the third day after you take the pendant to Anju. Wear this mask and slash at the bushes that move (like the ones in North Clock Town) to make Keaton appear. Answer his quiz questions correctly to get a Heart Piece.

16. Don Gero's Mask: Light all the torches in the Goron Village, then use the Goron roll to destroy the barrels on the chandelier. Take the chunk of meat to the shivering Goron in the mountain village. The mask will allow you to speak to frogs. See the Frog Locations below.

17. Zora Mask: Push the sick Zora to the shore in the Great Bay, and then play the song of healing for it. The mask turns Link into a Zora. Controls: A: Swim B: Dive R: Energy Field

18. Garo's Mask: Ride Epona into the racetrack on Milk Road, and win the race to get this mask. This allows you to get into the Canyon area.

19. Postman's Hat: Can be used to

open mail boxes in Clock Town. You get his mask by going through the Kafei notebook entry until you get the letter to Aroma. Give it to the postman, and then talk to him about it.

20. Circus Leader's Mask: Go into the Milk Bar, and help the Zora with his sound check by playing the instruments while wearing each of your three transformation masks (Deku, Goron, Zora) and as Link. If you wear the mask during Cremia's notebook entry there will be no attackers.

21. Couple's Mask: Complete Anju's notebook entry by recovering the stolen mask. Wear this and speak to the Mayor after 10pm for a heart piece.

22. Gibo Mask: Play the song of healing for the mummy in the Canyon house to get this mask that will allow you to speak to Gibdos.

23. Giant's Mask: Kill the Eyegore in the Inverted Stone Tower. This mask makes Link big.

24. Fierce Diety Mask: First gather all of the other masks in this list. Then, complete the mini-dungeons at the end of the game, and you will get this mask. It turns link into Oni Link.

Frog Locations

1. Laundry Pool
2. River Ride
3. Woodfall Temple in mini-boss room
4. Mountain Village after the Snowhead Temple is cleared
5. Great Bay Temple in mini-boss room

Once you locate all of the frogs, use Don Gero's Mask to speak to them. Re-unite them in the Mountain Village after you defeat Goh't to get a Heart Piece.

Slow Down Time

If you play the Song of Time backwards, time on the clock will move slower, but you will still move at the normal speed. This is very useful when

running long distances or when trying to prolong game time.

The song is: C-Down, A, C-Right, C-Down, A, C-Right.

To return the normal flow of time, simply play the song again.

Stone Mask Secret

A hidden feature of the Stone Mask is that it will camouflage Link. This is helpful because most of the enemies will not be able to see you. Bosses will still be able to see you, but most of the typical "run-of-the-mill" bad guys will ignore you.

Useful Items

And How You Get Them

Adult Wallet: Give banker 200 Rupees (or more) to get this item that allows you to hold up to 200 rupees.

NINTENDO 64

pay them 100 rupees. The sword will disappear if you travel back in time.

Hook Shot: Found in the Pirate's Fortress. It acts like a grappling hook, and will allow Link to pull himself to far objects. You can also kill enemies with it.

5. Complete the cemetery side-quest to get this bottle.
6. Complete Madam Aromas epic notebook entry to get the final bottle.

Legend of Zelda: Ocarina of Time

Big Bomb Bag

As a kid go to the bombchu game room in Hyrule Town Market. Play a second time, if you win, you will receive a bomb bag that can hold 30 bombs.

If you're not very good at bombchu bowling, here's another way to get a bigger bomb bag. As young Link, go to Goron City. There is a large Goron rolling around. Stop him with a bomb, and he will give you a bigger bomb bag.

Boot Locations

To get the Hover Boots go to the Shadow Temple as a adult and go through the invisible wall in the first room and there will be more invisible walls in the next room in one of them there will be a door leading to a dead-end. Beat it to get the Hover Boots. To get the Iron Boots beat the Ice Cavern.

Bottle Locations

Bottle #1: At Lon Lon Ranch, play Talon's Super Cucco Game. When you win, you will receive a bottle(1) with Lon Lon milk

Bottle #2: In Kakariko village, find all the cuccos and return them to the pen, then talk to the lady standing next to the pen, she will give you a bottle.

Bottle #3: At Lake Hylia (you must have the silver scale), dive into the water to find a bottle and a letter.

Bottle #4: As adult Link, go to the market and talk to the ghost person in the house directly to the left as you enter. Go outside and collect poes, once you collect 1000 points, the ghost will give you a bottle.

Chicken Attack

Any fan of the old Zelda games will have figured this one out already:

Attack a chicken repeatedly with your sword and it will call for backup. Soon, tons of chickens will flap around on screen, trying to give Link that same fuzzy "Birds" feeling as in Hitchcock's famous movie.

Simply leave the room or area to stop the chicken attack.

Creating Music with the Ocarina

You can get even more detailed in the music you play with the ocarina with these extra tips. To play flat notes, hold Z while playing a note. To play sharp notes, hold R while playing a note. To vary the pitch on a note, use the Control Stick. Try it out and compose your own masterpieces!

Cure a Wounded Sign

If you slash a sign to smithereens, you can put it back together by playing Zelda's lullaby on your ocarina. The sign will magically recreate itself in front of your eyes.

Extra Bottles

To get extra bottles go to a place where there are fish swimming in a shallow pool, like the hole behind the potion shop in Kokariko Villiage, or Zora's fountain. Equip a bottle, and swap at a fish. When he is in mid-swap pause it and equip something useless in the bottle's place and it will turn into a bottle. DON'T use something important, because you might not be able to get it back.

NOTE: The bottles will appear in your equipment screen, but you may not be able to use them.

Finding Gold Skulltulas

Before planting a Magic Bean in a mound of soft dirt, empty a jar of bugs (you can buy them for 50 rupees at Hyrule Market or just find them under rocks) on top of the mound. Catch one of the bugs immediately afterwards so you don't have to find or buy more of them. After one of the bugs goes into

NINTENDO 64

the mound of dirt, a Gold Skulltula will jump out, except for the mound right next to the bean selling guy.

Free Hylian Shield

You must NOT have the Hylian Shield already for this trick to work. Go to Kakiriko Graveyard at nighttime as a kid and pull back the grave with flowers in the first row of graves. Jump in the pit and open the chest inside.

NOTE: If you already have the Hylian Shield, the chest will contain a blue rupee.

Free Lon Lon Milk

If you have an empty bottle, stand in front of any cow and play "Epona's Song". The cow will feel energetic and fill your bottle up with Lon Lon Milk for free!

Getting the Biggoron Sword

Here is what you need to get and do to receive the Biggoron Sword. This is a great sword since it cuts swings to death practically in half. Some have time limits and don't warp or else it will reduce time and you need Epona for this. Use the same carrot method when you beat Ingo for this.

How to read: When you read one line, that tells you where you give a certain item to a person (e.x., Corjiro you get from Kakiriko Village from the Cucco Girl). The next line shows you where you give the item you obtained from the previous line to and where the person is.

Pocket Egg-Cucco Girl (Kakariko Village) (Note: Make him happy by waking up Talon and then go back to Cucco Girl)

Corjiro-Brother of Cucco Girl (Lost Woods)

Odd Mushroom-Mother behind potion shop (Kakariko Village)

Odd Potion-Kokiri Girl (Lost Woods)

Poacher's Saw-Carpenter (Gerudo Valley)

Goron's Sword-Biggoron (Death Mountain)

Prescription-King Zora (Zora's Domain)

Eyeball Frog-Professor (Lake Hylia)

Eye Drops-Biggoron (Death Mountain)
You will receive a claim check after step 9. Play the Sun's Song 6 times or wait three days to get the Biggoron Sword.

Golden Scales

Go to the fishing hut when Link is an adult. If you can catch a 15 pound fish you'll receive golden scales. These let you dive to 8 meters.

Magic Arrows

Fire Arrow - In Lake Hylia, walk across the bridges to get to the tree. Play the Ocarina to make it night time. Equip your bow. Play the flute again, then shoot the sun.

Ice Arrow - In the Gerudo training course, you must collect keys. When you have at least 5, walk into the door in front of the entrance, and use all the keys to make a path. In the big chest you will find the Ice Arrow.

Light Arrow - When you get all of the medallions, go to the Temple of Time. You will find Zelda and she will give it to you.

Magic Bean Square Locations

Here's the locations of the Magic Bean Squares.

Lake Hylia by the laboratory.

Desert Colossus by the temple.

Gerudo Valley by the bridge.

To the left of the entrance bridge to Kokiri Forest.

By the Kokiri shop.

Lost woods - trail to it: right, left, right, left, and left.

Zora's river by the bean selling man.

Kokiriko graveyard at the top-back-left corner.

Death mountain trail at the foot of dodongo cavern.

Play the Bolero of Fire to warp into the

death mountain crater and the square will be right near the point of arrival.

Scarecrow Song

When you go to Lake Hyrule as young Link, show your Ocarina to the scarecrow. He will ask you to play a song, so create one of exactly 8 notes and remember it. Show and play the song back to the other scarecrow. Come back to the lake as adult Link and play the song to the first scarecrow and you will learn the scarecrow song.

Secret Pictures in Zelda's Courtyard

Go to the courtyard where you first meet Zelda. Look in the windows, and in one of them you will see some pictures of some familiar video game characters!

Skulltula Rewards

Kill the following numbers of Skulltula Spiders and receive the items below:

- 10: Adult Wallet (holds 200 rupees)
- 20: Stone of Agony (hidden rumblings)
- 30: Giant Wallet (holds 500 rupees)
- 40: Bombchu (climbs up walls)
- 50: Piece of Heart
- 100: Gold Rupee (see "Unlimited Money")

Stone of Agony

Please note that you must have the Rumble Pak for this secret to happen. Once you acquire the Stone of Agony, equip it, and every time Link approaches an important item in the game, the Stone of Agony will beat real hard the closer you get to the important item. It is basically a little note that you're approaching something good.

Tunic Locations

To get the Goron Tunic go to Goron City as an adult and stop the little goron rolling on the 3rd floor with a bomb. Talk to him about the dragon and the gorons and he will give you the Goron Tunic. To get the Zora Tunic go to Zora's Domain as an adult and

Ghost Riders

You're probably familiar with the standard ghost racers (the ones you create in Time Trial mode), but did you know the course was haunted before you arrived?

To play against the official course ghosts, enter Time Trial mode and complete a track within the time shown below. After beating this time, immediately RETRY and you'll be see the message, "Now Meet the Course Ghost."

Prevent Skidding

If you skid or blow up, rapidly tap the GAS button until you recover (usually 3 to 5 times.) If you see a music sign then you did the trick right.

Throwing Tricks

To throw a banana forwards, hold Z while holding a banana, then press the joystick UP and release Z.

To toss a turtle shell behind you, hold Z while holding a banana, then press the joystick DOWN and release Z.

Turbo Boost

Press A as the starting light turns green. If your timing is right you'll race ahead of the other players.

Using the Z Boxes Usefully

I use this trick all the time to help my chance of winning in almost every mode of play. When I get a Z box, I wait until I see another item box one before planting mine. If I time it just right, the Z box I laid down will be right on top of where the original one was so if anyone goes to get it they can't tell it was a fake until they hit it!

Beat Challenges Easily

Having trouble beating some of the tougher challenges in PD's Combat Simulator mode? Here's little loophole that lets you easily beat all the challenges without any problems. All you need to execute this trick are two controllers and a memory slot to save your game.

Using the first controller, select Advanced Setup and create an easy scenario with nothing but MeatSims. Save the scenario, then access the Load Settings screen -- but don't load anything. Now use the second controller to select a challenge you would like to beat. Press Start until it says "ready and waiting."

Finally, use the first controller to load your scenario. You will now be able to play the challenge with the easy settings of your custom scenario. This trick will work with all challenges, but you have to change the combat setting depending on the type of challenge (eg: Hold the Briefcase or King of the Hill). You can use this little trick to completely customize the challenges, including the time limit.

Firing Range Trick

Here's a handy little trick if you're having problems beating all the weapons challenges in the firing range. Go into the Carrington Institute firing range and access the Laptop Gun challenge (for any medal). When the training session begins hold down the B button so the gun switches over to the secondary weapon mode (sentry gun). Hit Z to deploy the sentry gun -- but as soon as you hit Z hit the START

button. Select "abort", then hit START again as soon as the screen starts to fade. You should now be back at the weapon challenges list. You can now pick any challenge you haven't completed and commence the training. If done properly, the sentry gun should still be deployed and will start firing at the targets and beat most of the challenges for you. Note that there are some challenges where this trick doesn't work, such as the RCP-120.

Pokemon Stadium

Alternate Pokemon Colors

Did you ever notice how some of the Pokémon that appear in Pokémon Stadium have different colors? The secret to the color variations lie in the names you give your Pokémon as well as your trainer ID number (assigned to you in Pokémon Blue, Red or Yellow, whenever you start a new game). While there are a few secret names that change only certain Pokémon's colors, there are a few naming tricks that result in different color variations. For example:

- Use only lower caps (ie: poliwhirl)
- Reverse the syllables (ie: DRILLBEE)
- Abridge the names (ie: Pika)

For a more detailed listing of color differences, keep an eye out for IGN-Guide's Pokémon Stadium Guide. submitted by Uncle Peer

Battle Mewtwo

To unlock a hidden 6-on-1 battle with Mewtwo, beat the Gym Leader Castle and get trophies in all 10 tournaments in the Stadium Mode. The map screen will now turn to a night scene and a bonus tournament will open up in which you battle against the psychic super-Pokemon, Mewtwo (#150). Once you beat Mewtwo, you unlock a new game mode.

Bonus Stickers

Once you have beaten both the R-1 mode (including Mewtwo) and the R-2 Mode (including Mewtwo), you are given a set of bonus stickers that you can access in the Gallery Mode. When you're on the Gallery main screen, press and hold L and R and move the Cursor to Print. If you keep the buttons pressed, the Print option will now change to Bonus. You will now have access to a set of 16 bonus "wall-paper" stickers from all the different modes that you can print out at "Snap" Stations.

GB Speed Upgrades

There are two secret speed upgrades to the GB Tower Game Boy emulator that let you play Pokémon Red, Blue and Yellow at much higher speeds:

Doduo Mode:

Beat the Poké Cup

Once you have won all the Poké Cup tournaments, the GB Tower changes into Doduo GB Tower and a Doduo sticker appears on the Game Boy. The Doduo upgrade doubles the speed of the game play when playing the Game Boy game on your N64.

Dodrio Mode: Play the Game Boy games at hyper speed with this alternate speed settings. To get it, you need to beat the Prime Cup (after you have already beaten the Poké Cup). You can switch between the different GB Tower speed settings during gameplay by pressing C Right.

Get Amnesia Psyduck

Have you ever wondered how you can get the elusive Amnesia technique? Well, it's hidden deep in Pokémon Stadium. Unlocking it will take a while, but it's definitely worth it. You have to register ALL 151 Pokémon in the Hall of Fame. Whenever you beat a tournament (or Gym Leader Castle), your six Pokémon are entered into the Hall of Fame. It doesn't matter whether you use rental Pokémon or your own, but you can't have any gaps. Once you've filled it all up, you are awarded a free Psyduck bonus Pokémon that knows the Amnesia technique.

Get Surfing Pikachu

Yes, it's true: Surfing Pikachu is hidden in Pokémon Stadium. To teach your Pikachu Surf (a technique it can normally not learn), you need to first unlock the R-2 (Round 2) mode. Then do the following:

Enter the R-2 Prime Cup's Master Ball division (you have to beat the first three divisions first). Assemble a team that contains a Pikachu that does not yet know Surf. You

HAVE to use a Pikachu from your Game Boy game. You cannot unlock Surfing Pikachu using a Rental Pokémon.

Do not register your team! Pick it directly from your Game Boy cartridge. You now have to beat the Prime Cup's Master Ball division using a three-Pokémon team that always contains Pikachu. Pikachu has to be in every one of the eight battles. You are not allowed to use any continues. If you do, you won't get Surfing Pikachu.

Once you have fulfilled all the above conditions and beaten the cup, you are shown an award screen with Pikachu standing on a surfboard. From here on, Pikachu can use the Surf technique both in battle and during gameplay (Game Boy versions only). If you've got Pokémon Yellow, you can now also access the hidden Surfing Pikachu mini-game. Simply go to the small hut on the northern beach of Route 19.

Kids Club: Hyper CPU Difficulty

To unlock this hidden difficulty setting, select a single-player game against three CPU-controlled opponents. You need to win the "Who's the Best?" challenge five times in a row on HARD difficulty. This will open up the new HYPER difficulty setting for the CPU players.

New Title Screen

Beat both the Gym Leader Castle and Stadium modes to change the title screen (in addition to the map mode). The new title shows depict Pikachu, Blastoise, Charizard, Venusaur and Mewtwo.

Open Up R-2 Mode

To get the secret R-2 Mode (as well as a brand-new title screen) defeat Mewtwo after you have beaten the Stadium Mode and Gym Leader Castle Mode. You will now see the final credits sequence, which will unlock the harder R-2 Mode and all new battles.

NINTENDO 64

You can toggle between R-2 and Regular Mode at the start-up screen by pressing C-Right.

Rent Mew

Many of you have asked how you can get all 151 trophies in the Hall of Fame if you don't own the elusive bonus Pokemon Mew. No problem: Once you open up R-2 Mode, you can rent and use Mew in the Prime Cup (sorry -- you still can't get Mew in Gym Leader Castle and Free Battle).

Talking Pikachu

For a talking Pikachu, you need to upload one from Pokemon Yellow. Rental, Red, and Blue versions will just be silent.

Win Bonus Pokémon

Each time you beat the Gym Leader Castle (including the Final Four and your Rival), you will receive one of eight semi-rare to rare Pokémon. These Pokémon are awarded at random, so it's likely that you'll need to beat the Gym Leader Castle again and again to get the ones you want. Note that once you have beaten the Castle, you only need to defeat the Final Four and your Rival again if you want to win more Pokémon.

Here are the Pokémon you can win:

- #001 Bulbasaur
- #004 Charmander
- #007 Squirtle
- #106 Hitmonlee
- #107 Hitmonchan
- #133 Eevee
- #138 Omanyte
- #140 Kabuto

Pokemon Stadium 2

Unlock GB Tower Secrets

To get your Gameboy games to play at a higher speed at Game Boy Tower, defeat either Gym Leader Castle or all Stadium Cups in Round One. This will give you the Doduo sticker for GB Tower, allowing you to play Gold and Silver at double speed. If you beat the

Castle or Stadium Cups in Round Two, the Dodrio GB Tower will be unlocked, allowing you to play the Gameboy games at Hyper Speed.

New Start-up Screens

Beat all of the cups in Stadium mode and you'll unlock a special title screen. Do it again in Round Two, and you'll see yet another start-up.

Fight Your Rival

Once you beat all of the Cups in Stadium Mode and all of the trainers in Gym Leader Castle, you will unlock a special Rival Cup in the lower right corner of the main map. Click on it to take your team against the mega-tough trio of Mewtwo, Ho-oh and Lugia.

Get Rare Pokemon

Beating the Rival Cup the first time will yield a rare Farfetch'd Pokemon with Baton Pass. The second time you beat the Rival Cup (Round 2), you'll be granted a Gligar with the Earthquake move. Both of these moves are not normally learned by these Pokemon, making them super useful and very rare.

Harder Mini-Games

Challenge your computer opponents to a Hard seven-coin Mini-Game battle. If you win the game, another difficulty level will be unlocked: Super Hard.

Trading using Pokemon Stadium

What you need:

- Two Pokemon game cartridges
- Pokemon Stadium 2
- Transfer Pak
- Some captured Pokemon

How to do it:

1. Go to the Pokemon Lab in Pokemon Stadium 2
2. Go to the PC and select Pokemon
3. change the box to one of the N64 boxes
4. Put the Pokemon you want to trade into the N64 box

5. Save and quit and turn off your N64.

6. Put the other Pokemon game in the Transfer Pak

7. Repeat steps 1, 2, and 3, then put the Pokemon that are in the N6 4box into your party.

Note: there's one catch: the pokemon that are supposed to evolve when traded don't evolve.

Get More Knowledge at Pokémon Academy

Once you have finished all the classes and passed all of the tests and won the school battles (beating the Elite Class), more information will be available at the Library, including all Items available in all of the Gameboy Pokémon games.

Rent Celebi

To rent Celebi, you will have to open up Round 2 by beating all the cups in Stadium Mode, defeating all the trainers in Gym Leader Castle, and taking care of your rival. Once you open up Round 2, you will be able to rent Celebi.

Note: you can only rent Celebi in Prime Cup.

Super Mario 64

Bowser Shortcuts

On the first "vertical merry-go-round" (the one with the visible life in the middle), duck. When you reach the peak of the revolution, jump. If you timed right, Mario should flip onto a platform above him.

When you get half way up the first part of the metal ramp (the part where you can stand still and not fall before the first flame thrower), turn around and do a long jump. If you did this correctly you will be on the checkered platform with the small firebreathing plant.

Butterfly Punching

Sometimes in the game you will see a bunch of butterflies fly out of a tree or grass. Punch or touch any of them and they will turn into a 1-UP. Also some of the butterflies turn into bombs.

Camera Trick

After you've won the game, you can control the camera angle in the scene where Mario is talking to the Princess. To do so, use the analog stick on Controller Two. You can also do this on the Credits screen.

Change Obstacle Speed

To change the obstacle speed on Course 14, try this. For slower obsta-

NINTENDO 64

cles, enter when the minute hand is on 3. To stop them completely, enter when the minute hand is on 12. For the more ambitious, enter when the minute hand is on 6 for a greater challenge, or 9 for the ride of your life!

Extra Lives from Moles

You can get 1 extra life on any of the levels with moles. If you jump on 6 Moles there will appear a secret life.

Extra Lives on the Ice Stage

To find some extra lives on the Ice stage:

On the first Ice stage, begin your slide. On the first left turn, head for the row of Coins.

You'll slide into a tunnel that holds 2 extra lives.

First Person View

Set your camera mode to "HOLD CAM" then, using the regular camera, look around by pressing C-Up. Now hold R and press A or B. The Lakitu should be very close to Mario. Walk into the Lakitu to change your perspective. You can see your surroundings, but you may see pieces of Mario.

Healing

If your power meter is low dive into the nearest pool of water. When you resurface your power meter will be restored.

Hidden Coins

Run around any wooden post five times to receive five coins.

Short-cut in Tall Tall Mountain

When you start out in Tall Tall Mountain don't go the usual way, instead go the other way behind you you will find a 1-up and have to keep running after you get it and immediately afterwards go towards the wall you will be on a upper part of the level.

Shortcut to Star #4 on Lethal Lava

Go to Lethal Lava Land and pick Star #4. Find the Grating where Mr. I is waiting, then enter the hole. Wait and you

will warp to an island with a Wing Cap. Put it on, then do a triple jump and fly past the log onto the island with Star #4.

Shortcut to Star #6 in Cool, Cool Mountain

When you begin the level run past the cottage at the beginning and head to the platform where the snowman's body is. Near there should be a guy that sorta looks like a flower (He has flower petals on his head) and jump on him. Mario will do his helicopter spin. While Mario is spinning in air, He will decend slowly. Steer him towards the edge of the lowest platform of the area. (I.E. the Platform where the Icicles hang from) DO NOT LAND ON THE PLATFORM!! Instead, decend under the ledge and try to land on the Ice platform where star #6 rests. It's alot easier than using wall kicks to get it as labeled (Wall Kicks will work)!!

Sliding Shortcuts

To improve your time on the Red Sliding level:

Enter the Red Sliding level.

Jump to the left as soon as you exit the tunnel.

With a little practice you can land on the later part of the course, saving you valuable time. Complete the course in under 21 seconds to receive a Star. This shortcut works in the ice/blue sliding level.

Pass the first two turns.

Do not turn at the third turn.

Let yourself fall slightly to the left.

Teleport on Cool, Cool, Mountain

On the level Cool, Cool, Mountain where you start, turn right until you see a broken down bridge. Go to the very end of the bridge and it will teleport you to another broken down bridge right next to the mother penguin. However you can't take the baby penguin on this secret.

Unlimited Lives - American Version

When you start a game outside of the castle go to the second tree from the waterfall climb it and get the extra life. Now go into the castle door and come back out again to get another life, you can keep on doing this forever..

Unlimited Lives - Japanese Version

For infinite lives in the Japanese version, go to any of the Bowser bosses (the first is easiest). Run around Bowser and collect 1,000 of the coins he drops. From now on when you die you will gain a life instead of losing a life.

Unlimited Lives in Final Battle

When fighting Bowser for the third time, if you get killed you can keep getting a 1-Up by walking behind the top left pillar.

Visit Yoshi

1. Collect all 120 Stars
2. Go to the Castle Gardens
3. The grid near the Fish Pond will open, revealing a cannon
4. Shoot yourself onto the roof of the Castle and Yoshi will be there!
5. It's a short visit, but he'll give you 99 lives and a triple-jump move before he leaves!

Wave Race 64

Baby Dolphins and a Whale

To see the baby dolphins, go to Championship, Normal, then Warm Up. Now follow the dolphin three times around the course as best as possible. If you follow him correctly he will jump over the Bridge after the Dolphin Park sign. It's important that you do what the dolphin does, so if it does a barrel roll as it clear the jumps, then do barrel rolls; if it does flips, then do flips, etc. The dolphin seems to randomly make a choice as to which trick (if any) it performs each time you turn on the machine, so if you aren't good at the tricks, keep restarting machine until he's just clearing the jumps.

To see the killer whale, repeat this trick 30 times without a mistake. Good luck!

Big Dolphin

To view the big dolphin, you must go to Championship, Normal, then Warm Up. If you do this 20 times consecutively you will see a larger dolphin in Dolphin Park.

Dive off ramp
Barrel roll off ramp in both directions
If you did the trick correctly a dolphin will squeak when you cross the finish line. To ride your dolphin, select Dolphin Park in a Championship Race and hold Down while selecting your racer.

Quicker Start After Crash

If you crash during your race, instead of waiting for your racer to get up on the jet ski, tap the A button repeatedly. This will help you get up going faster and get on your ski faster.

Reverse Courses

If you win the gold cup on Expert, you get a Reverse option. Unlike Mario Kart 64 where the tracks are only "mirrored", in WaveRace 64 you can actually run the courses in their opposite direction.

Advance GTA

Hidden Go-Kart Mode

To access the Extra Go-Kart mode play through the championship mode and beat the beginners, middle, and high-speed classes. You should get a new car after the last race you win that is a go-kart and then go to the main menu and the first option that was unlockable will say extra.

Advance Wars

Advance Campaign

If you're already quite good at Advance Wars and you want an extra challenge, try starting an Advance Campaign. To get it, you need to first buy the "Advance Campaign" under Battle Maps (this will become available either after completing the Campaign Mode once). Once you have bought it (it only costs a buck), start a new Campaign while holding down the Select button. The words Advance Campaign will appear in the upper left corner, the computer AI will be tougher and some of the units in the following missions will be stronger. For example, instead of regular tanks, you often face MD Tanks, your opponent has more units, and you less, and so on. But in return, you will get much more cash for winning missions.

Clear Data

To erase all saved game data the easy way, turn on your Game Boy Advance and press and hold right, L and Select at the same time. Be careful that you don't accidentally delete your data, though.

Special Intel

After you have finished the Field Training missions (and in the course opened up the War Room, Campaign, Design Maps and Stats features), go back into Field Training. A very short tutorial called Special Intel is now available that gives you extra gameplay tips.

Unlock New COs

Beating the regular campaign will unlock Olaf as a playable CO in Vs. and Link Mode, but you can also get some of the other COs as well. The only problem is that you have to pay for them and certain conditions have to be met to unlock them. Check the Battle Maps room after you beat the Campaign mode -- and Hachi will offer COs for sale (for 50 coins, so save up). Here are the conditions that have to be met to unlock certain COs:

Olaf: Unlocked after beating Campaign Mode

Grit: Beat Campaign Mode and use Max in Mission 4. Buy from Hachi for 50 coins.

Eagle: Beat Campaign Mode and use Sami for missions 15, 16, 17, 18, then beat secret mission 22. Buy from Hachi for 50 coins.

F-Zero: Maximum Velocity

Unlock Sly Joker

To unlock a fifth car, the Sly Joker, beat the Pawn, Knight and Bishop series on Standard difficulty.

Unlock The Stingray

To unlock the second hidden car, the excellent Stingray, you have to beat all Pawn, Knight and Bishop tracks on Expert difficulty. Good luck. You'll need it.

Unlock Silver Thunder

To unlock the super-fast but a little less stable Silver Thunder car, you need to complete the Queen Series.

Unlock Falcon MK-II

You thought that was it, eh? Nope, here's yet another cool hidden F-Zero racer: the Falcon MK-II. To get it, you need to beat the Pawn, Knight, Bishop AND Queen series on Expert difficulty.

Unlock Fighting Comet

And just when you thought they'd run out of cars -- here comes the Fighting Comet. But you need to work to unlock it. Beat every series on the Master Class difficulty.

Unlock Jet Vermilion

Here's the ultimate F-Zero racer. Jet Vermilion is insanely fast when you're boosting and has the strongest body out of all of the machines -- but it's so hard to get, most gamers will give up and run away in horror. You have to actually complete each racing series on Master difficulty with each machine (chess icons next to the track selection screen show you which series you have already beaten with the respective racer). If that sounds too difficult, you can also unlock Vermilion by completing the championship 255 times. Which one sounds more appealing? Good luck.

Unlock the Queen Series

Like the Stingray car, the Queen

Series (with five additional courses set on Crater Land, East Ten Side, Laputan Colony, and two tracks on Fire Field) is unlocked by beating all Pawn, Knight and Bishop tracks on Expert difficulty.

Ranking Password

Nintendo has designed F-Zero with tournament play in mind. Since you can't upload your best times or take screenshots, the game features a built-in ranking password system. To obtain an encrypted password for your best track times, select Course Ranking from the main menu, then select your name and the track you would like to get a password for. Now hold the L-Button and press up, right, right, B, left, B, A. Your tournament entry password will now appear at the top of the screen and you can write it down. Nintendo uses passwords like these to let you enter into official tournaments, so keep an eye out for them.

Unlock Championship Mode

Not to be confused with the standard Grand Prix Mode, Championship is a hidden option that lets you race a Time Attack challenge against a ghost car on a specialty Synobazz track. The mode also offers the ability to see a replay of the winning run, complete with button commands display. To unlock it, register your name in the rankings of every race in every series.

Unlock Master Difficulty

To open up the hidden Master difficult level (in addition to (Beginner, Standard and Expert), you have to first beat a series' Expert difficulty level in the Grand Prix Mode. Note that this will unlock the Master setting only for that series. You still have to beat the Expert setting on the other cups as well to get access to all the Master classes.

Expert Technique 1: Rocket Start

F-Zero's quick start is a bit different from most Nintendo racers -- so forget about trying to hit the A-Button when

GAME BOY ADVANCE

the lights turn green. To get the fastest start possible, hold down your accelerator prior to the start and rev the engine to the point where your fuselage(s) begin to light up. Now listen to the engine sound. You want it to be in the mid-range, not the high-pitched sound that occurs when you continue to hold down the accelerator. If the engine is in the mid-range when the race starts, you will get a fast start that propels you in front of the pack. If you rev the engine too high, you will also boost ahead -- but then lose power and slow down for a few seconds.

Getting a Rocket Start requires precise timing. It helps to listen to the engine sound.

Expert Technique 2: Blast Turn

Like the Rocket Start, the Blast Turn is another expert technique. To successfully maneuver tight corners without bumping into the guard rails, take your finger off the accelerator (A Button), then press it again to stabilize your racer. Combine this with the L and R drifting to get the best times.

Expert Technique 3: Perfect Landing

Many of F-Zero's later tracks contain shortcuts that let you jump ahead of the pack by using jump plates. Be sure to look at the track layout in the lower left corner of your screen to see potential shortcuts. But knowing where they are isn't enough. You also need to know how to properly land without losing speed. If you just touch down on the track, your craft will bounce and you will slow down. You can avoid this by pressing down on the pad just prior to landing.

Hidden Demo Mode

To see an explanation of the above expert techniques and watch the computer complete a perfect lap and show you when to brake and when to boost, simply press the Select Button at the title screen.

Erase All Data

If for some reason you would like to delete all your scores and saved game data, simply hold L and R while switching on your GBA. You will then be asked whether you would like to delete everything -- select Yes to execute the function.

Reset Game

F-Zero has a built-in soft reset. If you want to reset the game without actually using the on/off button, simply press the following buttons at the same time: A, B, Select, Start.

Mario Kart: Super Circuit

Boost From Starting Line

A common move in all Mario Kart games is the ability to boost right from the starting line. This is done the same way in the GBA version of the game. To do it, you need to press the accelerator as soon as the green light comes on. You need perfect timing to do it, but if you do you'll boost ahead of the other racers right at the start.

Ecco the Dolphin: Defender of the Future Dolphin Soccer

This secret is found on the Powers of Levitation level.

To play dolphin soccer against a warring Clan member, the first order of business is to swim to the large central building underwater. Circle it until you find the Information Shard. Enter the central structure here and head down the tunnel until you find an oval door near the bottom.

This passage is split up by several organic doors that dilate when you get near them, allowing you to pass. Ignore the side paths for now, just head down the tunnel until you reach the chamber at the end. There is a Clan member here and a bubbler in the center of the room. If you turn and face the entrance, you'll notice an oval section of wall to the left moving slightly in the current. Swim through it to find a secret room. Inside is a Stealth power-up. Grab it and head straight back. There are a pair of yellow lights at the back of the room. Touch your nose to the right one to be taken to Dolphin's World Championship, a soccer match between you and a Clan member.

Screen Capture Feature

To access the screenshot capture program on PSO you'll need to have an additional Dreamcast controller plugged into port D of your Dreamcast, and an empty VMU. The VMU has to be TOTALLY EMPTY because the screenshot you take using the PSO capture program needs 195 blocks of space. Insert the VMU into socket 2 of the DC pad plugged into port D. Now, start up Phantasy Star Online and get into a game with a character - it doesn't matter if it's offline or online.

Now, to take a screenshot, take the DC pad plugged into port D and press Start, A and X buttons together. If you've done everything properly,

a black screen should appear with some numbers counting down at the upper right corner. Once the count-down ends, you'll revert back to your gameplay screen. You now have the portrait saved on the VMU! Though we have yet to figure out if there's any way to see the portrait on your Dreamcast, you can upload it through email and send it to friends! Additionally, you may be able to upload your screens on Sonic Team's Official PSO Visual BBS webpage where you can also view other PSO portraits on the site.

On the bridge go behind the chair Robotnik sits on, behind it is a door with 6 buttons in front of it, stomp on them in an order that spells E-G-G-M-A-N and the door will open. Fight vs. AJIM / Play as AJIM

To battle AJIM, you must have a time limit set (not on Death Match). Win the first one or two fights by gaining a health advantage and then letting the time expire. When an upward-pointing arrow appears over your next opponent as the round begins, AJIM will descend, destroying your erstwhile challenger and attacking. This will happen usually by the third battle. AJIM is very tough to beat, so pick your best character and hang in there. To control AJIM, you must challenge and defeat him as described (can't win by time-over). After beating AJIM, finish the game by completing all mis-

sions and destroying TANGRAM. Now, you have to set the clock in BOTH your DC and your VMU to February 15-30, 2000. Any month after Feb. is also fine, but AJIM is only available when your clock reads the last half of any month later than January, 2000. To select AJIM in any mode, go to the Random Select icon and hold both Turbos. AJIM will appear and can be chosen.

To sell eggs at chicken prices, grab an egg that one of your chickens has laid and put it in an incubator. Then walk to the animal shop and select Sell a Chicken, but highlight your egg. The shop owner will pay chicken prices for your egg!

Legend of Zelda: Link's Awakening DX

Red or Blue shirt

After you beat the Color Dungeon, a fairy will give you either a red shirt or a blue shirt. (The blue shirt will reduce your damage by half. The red shirt will give you the power to make you sword twice as strong. I think that the red is better.)

Revenge of the Chickens

In Mabe Village (where Marin and Tarin live and where the game begins), find a chicken and beat it with your sword continuously. After you take enough swipes at it, it'll call the cav-

alry, and you'll be savagely pecked to death by vengeful chickens! you can escape them by moving out of the screen and onto the next. This works with doggies, too, but they're more irritable and independant than chickens are! Have fun!

Money Saving Tip

If you're going to buy an expensive item, get it from the counter and go pay for it. As your money is being taken away press Start + Select + A + B at the same time. Choose SAVE AND QUIT then reload the game. If you were fast enough you'll have the item and most of the money you would have spent.

Alternate Picture

When you first go into the Photo Shop, talk to the mouse guy. When he asks you if he can take your picture, say NO. Then, keep on saying NO to the rest of his questions, and he will force you to get a picture anyways. It's pretty funny.

Die Without it Counting

When you get to the file opening screen there are three numbers located under the file name. These are the amount of times you die, but there is a way to keep everything you've collected after you die, without it counting on the meter. To do this simply wait until you die and press A, B, SELECT, and START - when you start spinning around, select SAVE AND QUIT.

Legend of Zelda: Oracle of Ages

Secret 100

Rupee Advance Shop

If you're lucky enough to already own a Game Boy Advance (like many of

the obsessed editors here at IGN), you can get into the Secret 100 Rupee Advance Shop in Oracle of Ages.

Simply plug this Game Boy game into your GBA and go to the house with the two doors in the village (shown below, left screenshot). On the GBC, the right door will be locked. On the GBA, you can march right in. The shopkeeper will welcome you and explain how only GBA players can access this store -- and as a special service, you can buy items here for 100 Rupees each. While some of the items are available elsewhere, you can also get a special Ring that's only available to GBA owners.

Trade Items to Get the Noble Sword

Trading Items provide another quest for Link. You don't have to participate, but if you do, you'll reap a powerful Sword upgrade which will make the rest of the game much easier.

Although you can trade items as you go along, I suggest doing it all at once right after the Level Four Dungeon.

Go to where your starting point would be in the Present. Notice the holes in the ground? Use the Switch Hook and the tilted blocks to get across. Move down the coast until you find a small shack. The Zora inside will give you a Broken Sword for your Ukelele.

13. Fix the Sword

To get the Broken Sword made whole again, go back to Restoration Wall and talk to Patch. He'll have you participate in another fixing ritual (like the one you did to get the Tuni Nut fixed). Once you successfully complete the slightly harder ceremony, your Sword will be fixed... into a Noble Sword!

Expand Your Bomb Bag

On your way to Restoration Wall to fix the Tuni Nut (Level 4), you'll push a red rock that changes the landscape. Once this happens, go back through the cave and return to the time hole above.

Go down the ladder near the hole, then get next to the vine sprout. Play your Harp here to send things back to the present. When you arrive, climb the vine to a cliff with a small pool of water on it. There is a sign here that tells you not to throw anything in the water. You like to break the rules, right? Chuck a Bomb into the center of this pool. A floating eye with wings will appear and ask you what you threw in. Tell him you tossed in a regular Bomb. He'll expand your Bomb bag to hold 30.

Expand your Seed Satchel

Once you have the Seed Shooter, return to Tingle, using the cave below (the one with the crystal ball in it). When you talk to him again, he will expand your Seed Satchel. Now you'll be able to carry 50 Seeds of each flavor.

Legend of Zelda: Oracle of Seasons

Bigger Seed Satchel

Once you get the Member's Card from the Subrosian Market, take it to the Horon Village Shop to gain access to the secret member's area behind the shopkeeper. There you'll be able to buy a bigger Satchel.

Get a Bigger Bomb Bag

In Subrosia, right after you've traded the Star Shaped Ore for the Ribbon in the Market, exit the building and return. A Bigger Bomb Bag will now be in its place. The Market owner will trade you for 10 Bombs and 50 Ore Chunks. Now your Bomb sack will hold 30 Bombs.

Get a Bunch of Rings

In the Subrosian Market, you can keep

buying Rings with Ore Chunks by leaving and returning. You can get about four or five Rings this way. They keep increasing in price, but Ore is plentiful here. And when the Rings run out, there are Silver Seeds in their place.

Mystery Seed Secret

Near Talon's house, you will come across a pack of hapless Cuccos. Hit one of them with your sword. As it retaliates, drop a Mystery Seed on it and it will grow to Godzilla proportions. That's a lot of McNuggets.

Secret 100

Rupee Advance Shop

If you're lucky enough to already own a Game Boy Advance (like many of the obsessed editors here at IGN), you can get into the Secret 100 Rupee Advance Shop in Oracle of Seasons. Simply plug this Game Boy game into your GBA and go to the house with the two doors in the village (shown below, left screenshot). On the GBC, the right door will be locked. On the GBA, you can march right in. The shopkeeper will welcome you and explain how only GBA players can access this store -- and as a special service, you can buy items here for 100 Rupees each. While some of the items are available elsewhere, you can also get a special Ring that's only available to GBA owners.

Trading Items

Trading Items provide another quest for Link. You don't have to participate, but if you do, you'll reap a powerful Sword upgrade which will make the rest of the game much easier. Although you can trade items as you go along, I suggest doing it all at once.

1. Cuccodex
Get this from Dr. Left after you light his torch for him.

2. Lon Lon Egg

Give the Cuccodex to Malon on the north end of Horon Village. She'll give you the Lon Lon Egg.

3. Ghastly Doll

Run into Maple with the Egg in your possession and she'll give you the Ghastly Doll.

4. Iron Pot

Take the Ghastly Doll to the mayor's wife Mrs. Ruul. She will give you an Iron Pot.

5. Lava Soup

Go into the Chef's Kitchen in Subrosia. Give him the Iron Pot and he'll give you Lava Soup.

6. Goron Vase

Give the Lava Soup to the giant Goron atop Goron Mountain in order to get the Goron Vase.

7. Fish

Go to Sunken City and find Ingo's house. Show him the Goron Vase and he'll zonk you a Fish.

8. Megaphone

Take the Fish to the area near Eye-glass Lake. Here, you'll meet an old man trying to get his cat out of the tree. Use the Fish to get the cat down and the man will give you a Megaphone.

9. Mushroom

Go to Mount Cucco and change the season to spring, then use the flower to get up to the high ledge. Go into the cave entrance and wake the sleeping guy inside with your Megaphone. This is Talon. He'll give you a Mushroom.

10. Wooden Bird

Visit Syrup. She'll see the Mushroom and complete her Potion. For your help, she'll hook you up with a Wooden Bird.

11. Engine Grease

Go back to Horon Village and go to the clock shop. Give the Wooden Bird to the clockmaker, and he'll give you the Engine Grease.

12. Phonograph

Take the Engine Grease to the Wind-

mill. Go to the top of the mill and talk to the man here. He'll take your Grease and give you a Phonograph. Great trade!

Final Item

Once you have the Phonograph, go through the Tarm Ruins to the Lost Woods. Play the Phonograph for the music-loving Deku Scrub and he'll give you instructions on how to get the Noble Sword. Move to the stump to the left and change the season to Winter. Head west in the Winter, west in the Autumn, west in the Spring and west in the Summer. You'll end up at a secret location, where you'll receive the Noble Sword.

Warehouse Court: Beat all of the Mario characters with a Mario character to get this court.

Castle Court: Get 60 points or higher in the third level of Shooting Star.

Jungle Court: Get 60 points or higher in the third level of Banana Bunch.

Unlock Special Rackets

When you become a member of the Travelling Team, go visit the man hanging out near the pond in the upper right corner of the Training Court.

This cheeky lad will challenge you to a racket-swinging contest. You'll have 10 seconds to swing your racket. If you are able to swing it 100 times in this time frame, you'll earn the Silver Racket. If you can (and this is near impossible) swing the racket 150 times, you'll get the Gold Racket.

Use the Transfer Pak to Unlock Characters

If you have the N64 and GBC versions of Mario Tennis, you can use the Transfer Pak to unlock new characters. In order to transfer certain players, you will have to unlock them first in the N64 version of the game. Then, pop the GBC cart into the Transfer Pak and download your new characters!

Pokemon Yellow/Blue/Red

Only Way to Get Mew

We've seen so many fake Mew codes

pop up on the web (and we get about 20 new fake Mew code submissions A DAY) that we've decided to add this following disclaimer to our codes section:

According to Nintendo, Mew cannot be found or caught in Pokemon Yellow, Red, or Blue. Outside of a GameShark code (which may mess up your Pokedex and render the game incompatible with Pokemon Stadium), the #151st Pokemon remains a cool little extra that is only handed out by Nintendo on special occasions, such as Mall Tours or Pokemon events.

However, all those who want to catch a glimpse of the rare Pokemon can select Mew as a rental Pokemon in Pokemon Stadium for Nintendo 64 (but you cannot upload it to your Game Boy game). Note that Mew is just that -- a bonus Pokemon (albeit a very cool one that can learn all TMs) -- and not technically required to complete your Pokedex.

Get Surfing Pikachu

Did you ever notice the small house at the northern beach of Route 19 that wasn't in Pokémon Blue and Red? This hut is home to the infamous "Surfing Pikachu" mini-game. Here's the deal: if your Pikachu knows Surf, you can play the mini-game Pikachu's Beach right here. The only problem is that Pikachu can't learn Surf... Well, at least not in Pokémon Yellow. Here's how you get Surfing Pikachu (outside of winning a Nintendo Pokemon contest):

Surfing Pikachu is hidden in Pokémon Stadium for the Nintendo 64. To teach your Pikachu Surf (a technique it can normally not learn), you need to first unlock the R-2 (Round 2) mode. Then do the following:

Enter the R-2 Prime Cup's Master Ball division (you have to beat the first three divisions first).

Assemble a team that contains a Pika-

chu that does not yet know Surf. You HAVE to use a Pikachu from your Game Boy game. You cannot unlock Surfing Pikachu using a Rental Pokémon.

Do not register your team! Pick it directly from your Game Boy cartridge.

You now have to beat the Prime Cup's Master Ball division using a three-Pokémon team that always contains Pikachu. Pikachu has to be in every one of the eight battles.

You are not allowed to use any continues. If you do, you won't get Surfing Pikachu.

Once you have fulfilled all the above conditions, you are shown an award screen with Pikachu standing on a surfboard. From here on, Pikachu can use the Surf technique both in battle and during gameplay (Game Boy versions only). In Pokémon Yellow, you can now also access the hidden Surfing Pikachu mini-game. Simply go to the small hut on the northern beach of Route 19 and talk to the guy inside.

Cut Down Grassy Areas

Once you get the HM "cut", your Pokemon can cut down grassy areas. Use "cut" and it will cut a two by two area. Wild Pokemon will not attack you in the area you cut.

Easy Level Gain

To easily gain experience, simply switch the Pokémon you want to train with the top Pokémon on your list. When you go into battle the Pokémon will pop out. You can then switch to another Pokémon. Once you win the battle the beginning Pokémon and the fighting Pokémon will both gain experience points.

Get Bulbasaur

To get Bulbasaur beat misty nugget bridge and get to bill's house. Defeat the rocket and get Dig. Go back to the house and she will give you Bulbasaur! submitted by Keith Wangler

Get Amnesia Psyduck

Have you ever wondered how you can get the elusive Amnesia technique? Well, it's hidden deep in Pokemon Stadium for the Nintendo 64. Unlocking it will take a while, but it's definitely worth it. You have to register ALL 151 Pokemon in the Hall of Fame. Whenever you beat a tournament (or Gym Leader Castle), your six Pokemon are entered into the Hall of Fame. It doesn't matter whether you use rental Pokemon or your own, but you can't have any gaps. Once you've filled it all up, you are awarded a free Psyduck bonus Pokemon that knows the Amnesia technique. You can now upload it to your Game Boy pak and use it in your quest.

Get Charmander

Go to Cerulean city and beat the five trainers on the bridge going north, then go in to the first square walk away and then talk to the guy in it, he will give you Charmander.

Get Mewtwo

You can only get Mewtwo after you have beaten the game. First go to Cerulean City and go past the five trainers. Take a left and you are in a grassy area. Then continue down the water (you need Surf to get in the water) until you see land. Get on that land and enter the dungeon (if you haven't finished the game, a guy will be blocking the entrance). Work yourself through the dungeon until you're on the bottom floor. You will see Mewtwo. Use your Master Ball to catch it.

Get Raichu

To get Raichu, trade the Pikachu you started with to a Red/Blue version after It gets to be about Lv. 50-60. Then use a Thunderstone on the Pikachu you traded. After it evolves, trade it back to Pokemon Yellow. Now you will have Raichu. Be careful, though. Pikachu will no longer follow you around if you do this. You may be much better

off just trading a Pikachu caught in Red/Blue and evolving that one.

Get Squirtle

To get Squirtle first you must beat Lt. Surge. Then go talk to officer Jenny in the middle of the city and she will give you Squirtle.

Pokemon Gold/Silver

Alternate Pokemon Colors

Did you know that there are Pokemon hidden in Gold/Silver that have alternate colors, aka shiny status? There is no easy way to find them (except for the Red Gyarados in the Lake of Rage) as they appear at random -- but they're out there. If you see specially colored Pokemon, be sure to catch them as they are very rare. You can recognize them by the sparkle effect when they appear in battle, or by checking on the Pokemon Status Screen. Next to the Male/Female symbol, these special Pokemon are marked with three dots.

There are any number of these rare types, including alternate versions of Nidoking (dark blue), Golbat (purple/green), Tentacruel (green eyes), Rapidash (purple), Scyther (orange/green), Hoothoot (yellow/purple), Sudowoodo (green/red), Ho-oh (yellow/orange), and more.

Breeding Evolutions

At the Daycare Center south of Goldenrod City on Route 33, you can give a male Pokemon and a female Pokemon to the keepers to breed new Pokemon.

Breed two Pichus to get Pichu.
Breed two Electabuzzes and you get Elekid.
Breed two Clefairs and you get Cleffa.
Breed two Jigglypuffs and you get Igglybuff.
Breed two Magmars and you get Magby.
Breed a Venonat with a Pinsir to get Pinsir.

Breed a Hitmonlee or Hitmonlee with a Ditto to get Tyrogue.

Breed a Clefairy with a Snubbull to get another Snubbull.

Breed a Gyarados with the Red Gyarados to get a golden Magikarp.

Replace any of the Pokemon with the genderless Ditto if you've only got one of a kind. Ditto will act as a wildcard Pokemon.

Duplicate Items/ Clone Pokemon

Note: Use this code at your own risk. It may corrupt your save data if done incorrectly.

Go to a PC, and save. Attach the item you want to duplicate to the Pokemon you want to clone. Deposit it into the PC. Change boxes. When the screen is saying "Saving the game..." Turn off your GB. Turn it back on. You should have the deposited Pokemon in the PC, and a clone of it in your lineup. The item will either be on both monsters, or in your Backpack. Note: while doing this code, DO NOT withdraw any Pokemon. When the GB is turned back on, you'll find that the withdrawn Pokemon has been deleted. Note: You can duplicate up to 5 items/Pokemon at a time.

Quicker Credits

While the credits are being displayed you can hold the B button to make them go faster.

Rare Pokemon Locations

Having trouble finding those really rare Pokemon in Gold/Silver? No problem, IGN's here to help:

Ho-oh -- There is only one Ho-oh in Gold and Silver, so make sure you catch it. You can find it on top of the Tin Tower, but you'll need the Rainbow Wing to go up there. You get the Rainbow Wing from the Radio Station Manager in Goldenrod City (Gold version) or the old man in Pewter City (Silver version).
Lugia -- You can find Lugia in Whirl

Island, off Route 41. You'll need to know the HM 06 Whirlpool technique to get in as well as the Silver Wing. You can find the latter in Pewter City (Gold) or the Radio Station in Goldenrod City (Silver).

Chikorita, Totodile, Cyndaquil -- These are the three starting Pokemon in Gold/Silver. You have to pick one of the three -- if you want the others, you'll have to trade with a friend.

Entei, Suicune, Raiko -- Dogs, cats, what are they? Who cares! They're cool and they're exceedingly rare. To catch these guys, go to the Burned Tower in Ecruteak City. When you get close to them, they will run away. After this brief encounter, these fast creatures will roam around Johto. So where do you find them? Check your Pokedex and have some Fast Balls ready. Togepi -- Professor Elm's assistant will give you an egg in Violet City after you beat the Gym Leader there. It will hatch into Togepi.

Tyrogue -- You can get this young Fighting Pokemon from Blackbelt Kyo (if you have an empty slot in your party) in Mt. Mortar, or simply breed one using Hitmonchan or Hitmonlee and a Ditto.

Sudowoodo -- This odd Rock type blocks your way on Route 36 (just like Snorlax). Use the Squirtbottle from Goldenrod City to battle it.

Porygon -- You can get Porygon for 9,999 coins in the Celadon City Game Corner.

Snorlax -- Snorlax is blocking the way into Diglett's Cave. Use the Poke Flute to wake it up.

Eevee -- Apart from winning an Eevee in Pokemon Stadium or the Celadon City Game Corner, you can also get one at Bill's House.

Aerodactyl -- There is only one Aerodactyl in Gold/Silver, but it's not that hard to get. Catch a Chansey and trade with the girl on Route 14 to get it.

Trade Evolutions

There are a couple of Pokemon that only evolve when traded with another

trainer. Some trade evolutions also require that the Pokemon holds a certain item when traded. Here's the list:

Kadabra - Alakazam
Graveler - Golem
Haunter - Gengar
Machoke - Machop
Poliwhirl - Politoed (hold King's Rock)
Onix - Steelix (hold Metal Coat)
Scyther - Scizor (hold Metal Coat)
Porygon - Porygon2 (hold Up-Grade)
Slowpoke - Slowking (hold King's Rock)
Seadra - Kingdra (hold Dragon Scale)

So, if you have a shortcut on the desktop you will want to put the code in this way:

"C:\Program Files\Diablo2\Diablo2.exe" -w

NOTE: The directory where the game is installed will vary per computer. Also, be sure to put the -w in after the quotes.

Claim Your Items After Death

Normally when you die, your corpse will remain where you croaked, surrounded by whatever killed you. To avoid this, after you die Save and Exit the game. Now your corpse and possessions can be picked up in the safety of the town.

Easy Way to Up Gems

If you have a particular gem that you wish to increase (such as raising a chipped ruby to a flawed ruby) then this trick is for you.

1. Find a gem shrine, but don't click on it.
2. Then put the gem that you wish to increase in your inventory, but make sure no other gems are present in your inventory. It would even be smart to remove any items that you are wearing that contain gems.
3. Then when you have everything

PC CD-ROM

above finished click on the gem shrine.
4. The gem that you had in your inventory will be on the ground but it will be increased .

For example: If you had a flawed ruby in you inventory and you clicked on the gem shrine, you flawed ruby will be changed into a ruby!

Save Yourself From Certain Death

If you are about to die and have no Potions, simply press ESC, then Save and Exit the game. When you boot up again, you'll find yourself in the safety of the town. Now you can buy health, repair items and go to a more manageable location to gain levels.

Enable Cheats

To enable cheats, make a backup copy of a game file. Once this is done, open "user.ini" in a text editor. It can be found in the deusex/system directory. Now assign the T key (upper and lower case) to "talk." Change all entries for the T key in the file, then save it and exit. Launch the game. During gameplay, press T and the computer will display the prompt "Say." Delete this and enter instead "set DeusEx.JCDentonMale bCheat-sEnabled True" to enable cheat mode. Then to enter a cheat, press T again and type away.
